Student Success Metrics Cohort View

- Valuable addition to the LaunchBoard toolkit
- Enables examination of differences across cohorts
- Provides critical insights into equity gaps, such as completion by gender and ethnicity

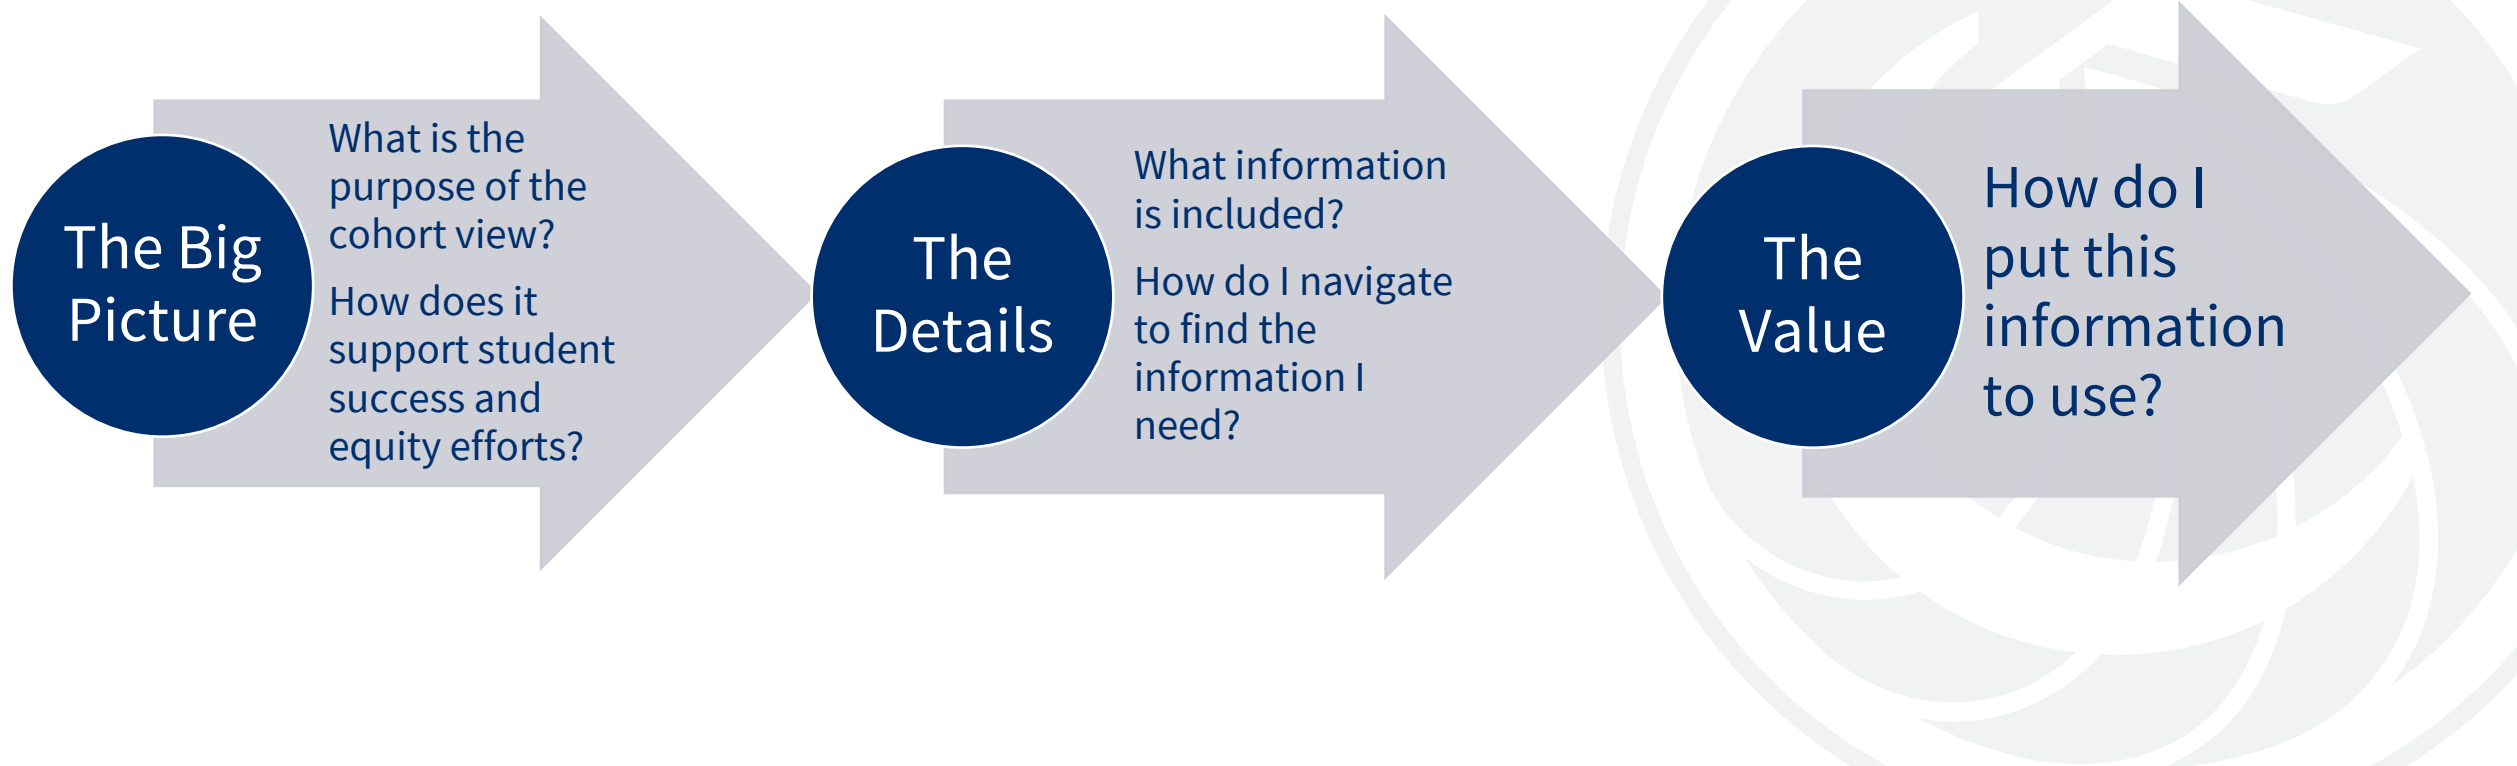

Continuous Improvement

Tool

Example

What you'll learn today

Student Success Metrics Dashboard

Classic -- showcases a **snapshot** of student progression combining students of different ages and progress on the same **educational journey**

Cohort -- tracks progression of a **cohort** students who start in a **selected academic year** across time

Picture from
the movie the
Goonies

Picture from
the movie
Finding
Ohana

Picture of the cast of Harry
Potter from each of the
movies, to show the
progression of the cohort

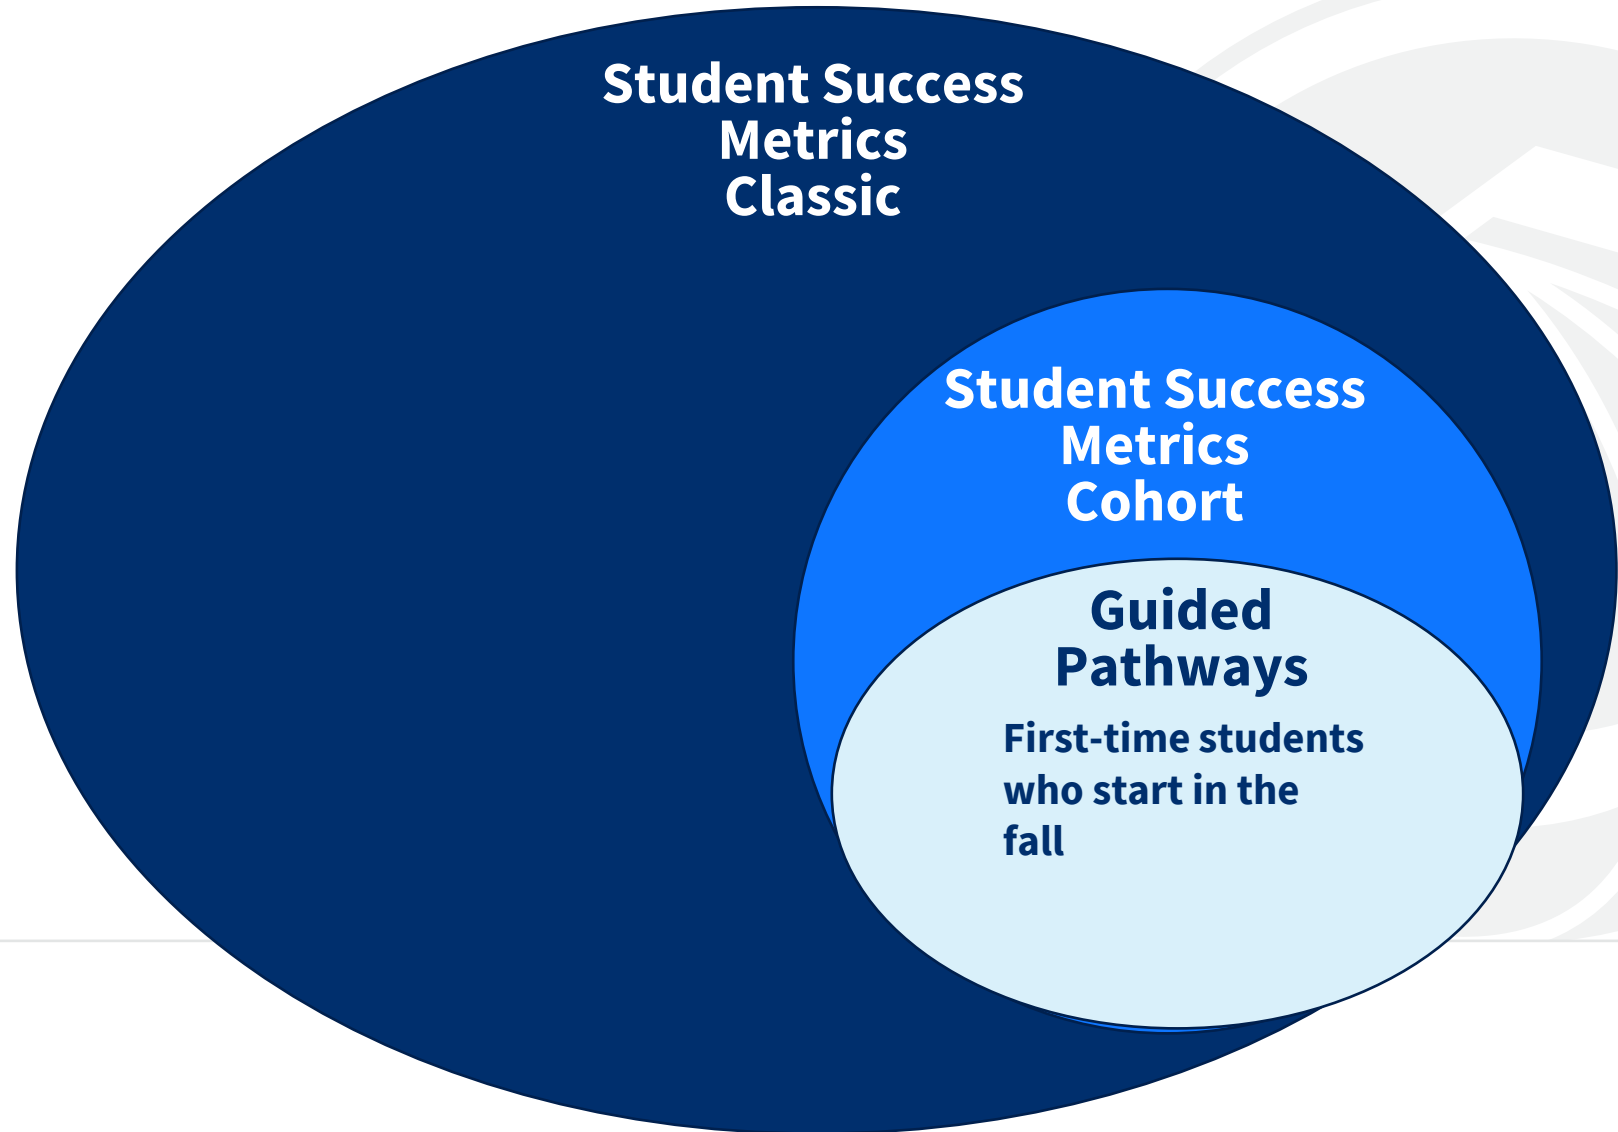

Student Success Metrics Cohort View

Student Success Metrics - Cohort shows students' progress toward completion and beyond for students **who enrolled as first-time credit non-special admit in the system**

- **What:** Information about students' progression across educational journey milestones
- **When:** Data from 2014-2015 to 2019-2020 across 3-, 4-, and 6-year timeframes
- **Who:** Students enrolling for the first-time in the system as a non-special admit in any term of the selected year
- **Why:** Explore the impact of efforts and initiatives, including disaggregations; aligned to system and statewide accountability

The Cohort view shows a subset of students included in the Classic SSM Dashboard

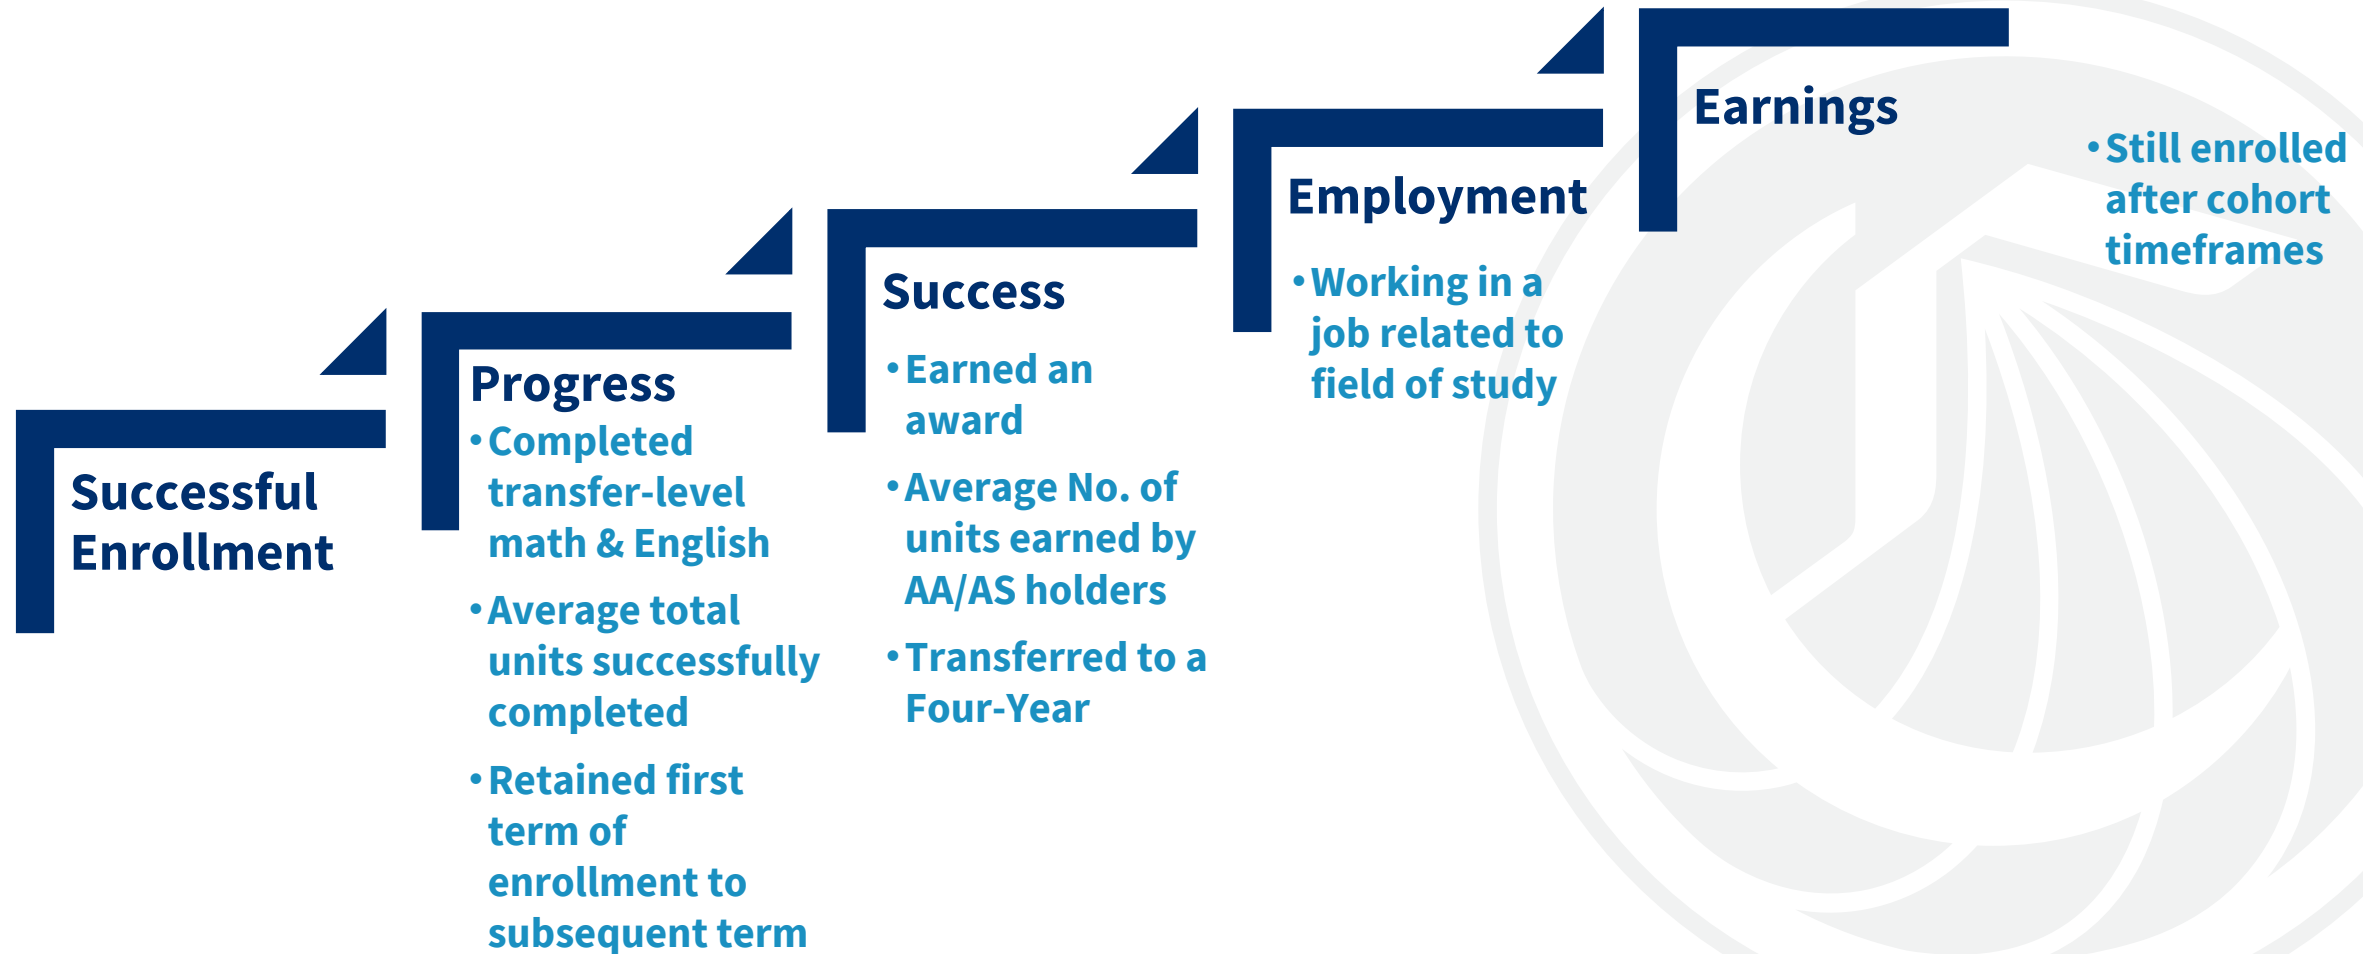

NOT TO SCALE

The SSM Cohort View is currently only available for all students

The Student Success Metrics Cohort View includes information about students' progress

Key Components to the Cohort View

- **Starting Year:** Identifies the cohort for whom you will examine progress

- **Cohort Length:** Sets a time frame to examine progress

Do you want to see students progress after three years, four years, or six years?

Picture of the Weasley children: Picking a starting year is identifying which cohort of students you will follow; it is like choosing to track the twins (Fred & George), Ron, or Ginny.

Pictures of Ron's cohort (Harry, Ron, and Hermione) as they progress through the series

Cohort View: Purpose & Role

- Tracks the **SAME group** of first-time credit students over different periods of time to attainment of metrics in Vision for Success and Student Equity and Achievement
 - First term in the cohort considered to be responsive to the realities of how community college students start their educational journey
- Supports **Student Equity & Achievement** planning
 - Includes the required disproportionate impact
 - Secondary disaggregation by gender (e.g., female veterans vs male veterans)
- Displays all information for a single cohort of students in the selected **starting academic year**
- Allows exploration of institutional changes by comparing outcomes **across cohorts**
- Adds ability to see if students are **still enrolled** after 3, 4, or 6 years

Who is included in the Cohort?

In the starting academic year and the locale selected (college, district, microregion, macroregion or statewide), students who met the following criteria are included in the cohort:

- Appear as a first-time non-special credit admit in the system at the selected locale **in a primary term**
- Have a minimal credit enrollment of **0.5 units***
- **Never had a previous enrollment at any postsecondary institution** when the student was 18 or older at any time up to and including the selected academic year

What the cohort view won't tell you and why

DID YOU KNOW?

In 2019-20, first-time credit NSA cohort accounts for **15% of the students included** in the SSM dashboard

- Data is **only displayed** when timeframe allowed to meet outcome of metric **is complete**
 - To accommodate students who do NOT begin in Fall with same opportunity to complete within a given amount of time, additional year of data is needed to complete the timeframes
 - For example, if “After 6 Years” is the selection, then 7 years of data are needed for select metrics.
 - Data will not yet appear for some combinations of 3, 4, 6 years and starting year selections
- Secondary disaggregation is only available for gender
 - Note: secondary disaggregation may lead to **suppression** due to small *N* sizes

Comparing classic and cohort views

- Look and feel has been **maintained** when possible
- **Alignment with metrics** in the classic view has been **maintained** when possible
- Completed Transfer Level Math and English in the district in the first year is **similar** to align with Student Centered Funding Formula
 - New metric under development definition is available as a drilldown where data is complete
- New drilldown **“Cohort Length”** for selection of timeframe (After 4 years, etc.)
- **“Starting Year”** for the cohort along with **“Cohort Length”** determines the data to be displayed
- New **“View by Gender”** appears on each chart when a primary drill down is selected
- **New metrics** have been added for Retention and for Still Enrolled

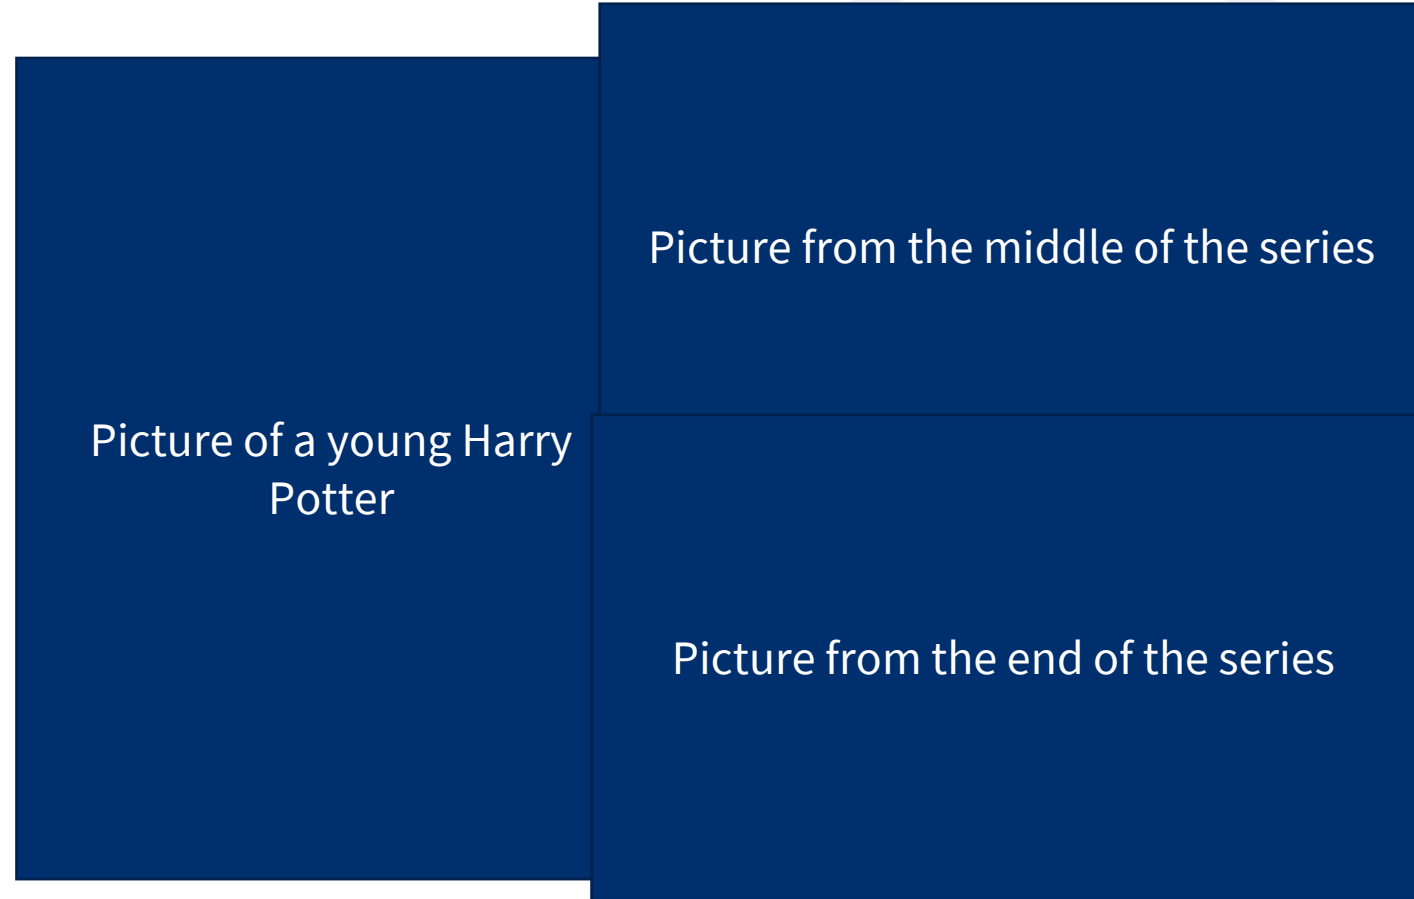

We want your feedback

- Consider this our table read
- Prototype version that will continue to evolve
- Please provide feedback to launchboard@cccco.edu

Picture of a table read from Harry Potter and the Cursed Child

Understand the journey of student success

- Examine our heroes' development
- Consider the impact of our behind-the-scenes changes

The Details

What information is included?

**How do I navigate to find the
information I need?**

Upcoming Adult Education Pipeline webinars

12:00pm – 1:00pm on Tuesday, April 27th

Stay in the Know! This webinar will walk you through the changes you will find on the AEP Dashboard. These improvements include new drilldowns, definitions, and datapoints that provide more reliable and nuanced data reporting. We will address how this may be reflected in changes to program outcomes and how you can use this data for planning.

[Link to Register](#)

12:00pm – 1:00pm on Friday, April 30th

This webinar will overview the unique features of the AEP Dashboard, how to navigate and interpret the data, and how to use the data to inform continuous improvement. This webinar will spotlight consortia that have used AEP Dashboard data to inform evaluation and Continuous Improvement efforts.

The screenshot shows the 'California Community Colleges Student Success Metrics' dashboard. At the top, there is a 'LaunchBoard Menu' button and the California Community Colleges logo. The main header area includes the text 'Student Success Metrics' and two links: 'Interested in the cl metric definitions 2020 release? See t in Definitions docu' and 'Interested in how t calculated? See the Definition Dictiona'. Below the header, there are four filter sections: 'Journey Type' with a dropdown menu set to 'All Students'; 'Location' with radio buttons for 'Statewide', 'Macroregion' (selected), 'Microregion', 'District', and 'College', and a dropdown menu showing 'San Diego/Imperial Counties' with a search bar and a list of regions including 'Bay Area', 'Central/Mother Lode', 'Inland Empire/Desert', 'Los Angeles/Orange County' (highlighted), and 'North/Far North'; 'Year' with a dropdown menu set to 'All'; and 'Drill Down' with a dropdown menu set to 'None'. A yellow 'VIEW' button is located to the right of the 'Drill Down' filter. Below the filters, there is a section titled 'Successful Enrollment' with a sub-header 'Applicants Who Enrolled in a Community College' and a paragraph of text: 'Among applicants who indicated an intent to enroll in the selected college in the selected year, who indicated a goal to place them in the selected student journey, the proportion who enrolled in at least one term as a non-special admit student at a community college in the selected year'. An 'Export Data to CSV' button is located to the right of the text.

Viewing Data for: After 3 Years, Statewide

Note: The cohort view is being released as a prototype and will continue to evolve. If you have any feedback or comments, please email launchboard@ccco.edu.

Data are only displayed when the timeframe allowed to meet the outcome of the metric is complete. Importantly, in order to accommodate providing students who begin in Spring the same opportunity to complete within a given amount of time, an additional year of data is needed to complete the timeframes. As a result, depending on the metric, there are multiple years for which data is not displayed.
