

California Community Colleges

Community College Pipeline Dashboard 2022 Release Webinar

December 8, 2022

Bitly link for PPT: <http://bit.ly/LBCCP-08122022>

Welcome

Sandra Sanchez

Vice Chancellor

Economic and Workforce Development

California Community Colleges Chancellor's Office

John J. Hetts

Executive Vice Chancellor

Office of Innovation, Data, Evidence, and Analytics

California Community Colleges Chancellor's Office

Quick Reminders

- Chat is disabled, but presenters will post links and other information in chat
- Link to the slide deck is currently available in chat
- Participants will need to use Q&A feature to ask questions to be answered live or directly in Q&A
- Closed Captioning is available by clicking the "CC" button on your screen

Objectives

By the end of this webinar, participants will understand how:

- The nearly **150 metrics** in the Community College Pipeline (CCP) enhance data in other dashboards for conducting local program review or for fulfilling other requirements for student data
- The dashboard has been **updated and improved**
- The **equity gap charts** and drilldowns can support conversations around addressing persistent equity gaps
- The **LMI and online job postings** data from Lightcast (formerly Emsi) has been updated to consider regional jobs, annual openings, skills, qualifications and employers

Purposes of CCP

- Informs Program Review
- Enhances limited information in other Accountability dashboards
- Helps in evaluating persistent equity gaps
- Highlights where we need to focus improvement efforts or to expand what is working well
- Provides LMI and online job postings data to consider

What is the Community College Pipeline Dashboard?

The most comprehensive dashboard, offering longitudinal data about students that is specific to industry sector or TOP code level

Offers detailed data to help inform **who** we are serving and **how well** we are serving them in our system

The screenshot displays the LaunchBoard dashboard for California Community Colleges. At the top, it features the California Community Colleges logo and the text "LaunchBoard". Below this, a descriptive paragraph states: "The LaunchBoard, a statewide data system supported by the California Community Colleges Chancellor's Office and hosted by Cal-PASS Plus, provides data on progress, success, employment, and earnings outcomes for California community college students. [Find out more about the LaunchBoard dashboards here.](#)"

The dashboard is organized into several sections:

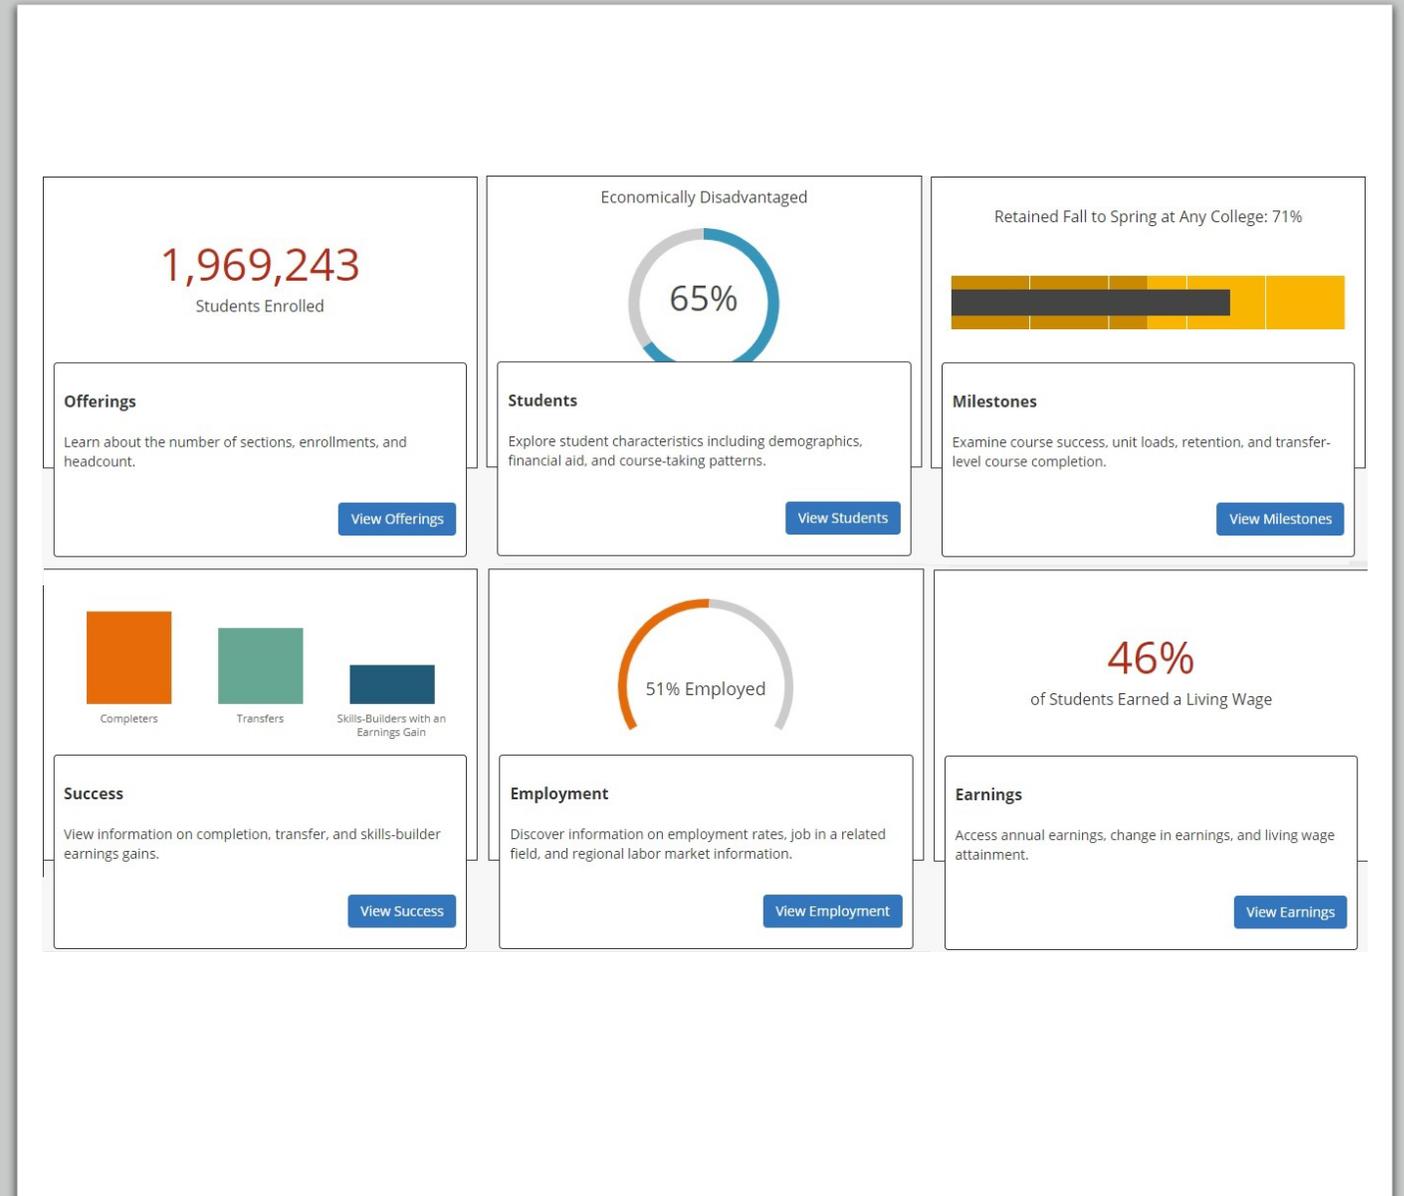

- Student Success Metrics:** A section titled "Student Success Metrics" with a sub-header "Student Success Metrics Dashboard" and a description: "View student progression along various educational journeys, from recruitment to completion, transfer, and the workforce." It includes an "Explore" button.
- Community College Pipeline:** A section featuring a line graph with five data points. The description reads: "Community college offerings, student characteristics, milestones, completion, and employment outcomes to support program review and planning." It includes an "Explore" button.
- Adult Education Pipeline:** A section with the "CALIFORNIA ADULT EDUCATION" logo. The description states: "Comprehensive, multi-level data on student demographics, enrollment, outcomes, types of services received, and employment using new adult education data and accountability metrics." It includes an "Explore" button.
- Strong Workforce Program:** A panel with three circular icons representing different workforce roles. The text says: "Completion and employment data for examining long-term outcomes." It includes an "Explore" button.
- K-14 CTE Transitions:** A panel with four circular icons representing educational transitions. The text says: "Examine outcomes for high school CTE students after they enroll in community college." It includes an "Explore" button.
- Guided Pathways:** A panel with a graphic of a classical building labeled "Four Pillars of Pathways" (CLARITY, INTAKE, SUPPORT, LEARNING). The text says: "First-year momentum points for evaluating college redesign efforts." It includes an "Explore" button.
- Resources:** A panel with a lightbulb icon. The text says: "Access infographics, short videos, and guides to learn how to use LaunchBoard information to support educational improvement efforts." It includes an "Explore" button.

At the bottom of the dashboard, it says "Developed in Partnership With" and lists several partner organizations: Delta College, ERP, Educational Results Partnership, theRPgroup, WestEd, and C-O-E Centers of Excellence.

CCP Dashboard

Provides details to help us understand who our students are, how well we are serving them, and what their outcomes are in the workforce once they leave us

Community College Pipeline enables users to find program-specific information

| Locale | AND | Program | AND | Year | AND | Disaggregations |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----------------------------------------------------------------------------|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> • Statewide • Macroregion • Microregion • District • College | | <ul style="list-style-type: none"> • All programs • All CTE Program • All Non-CTE Programs • Sector • Top04 • Top06 | | <ul style="list-style-type: none"> • 2011-2012 to 2020-2021 | | <ul style="list-style-type: none"> • Gender • Race/Ethnicity • Age Group • Perkins Economically Disadvantaged <p style="text-align: center;">↑</p> <p style="text-align: center;">New in 2022</p> |

Recognize Possible Successes and Challenges

For example, between 2011-12 and 2019-20:

- 2,787 more female students attained the Vision Goal Definition of Completion or Transferred which is a **19% increase**
- 5,331 more male students achieved the metric outcome which is a **37% increase**

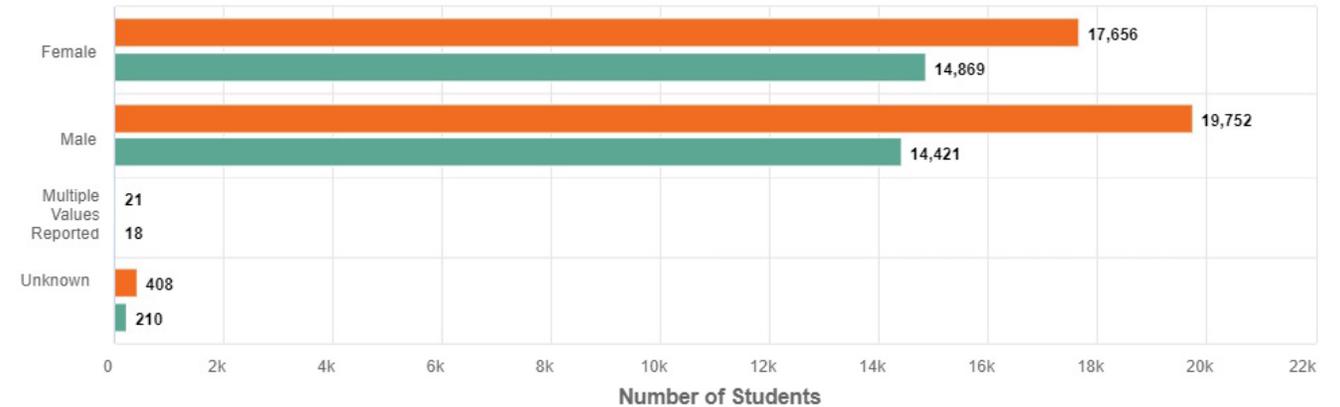

Attained the Vision Goal Completion Definition or Transferred to a Four-Year

Among students in selected student journey, the number of students who attained the Vision for Success definition of completion in the selected year or who enrolled in a four-year institution in the subsequent year

- Statewide, Information and Communication Technologies - Digital Media, 2019-2020
- Statewide, Information and Communication Technologies - Digital Media, 2011-2012

DRILL DOWN

Gender

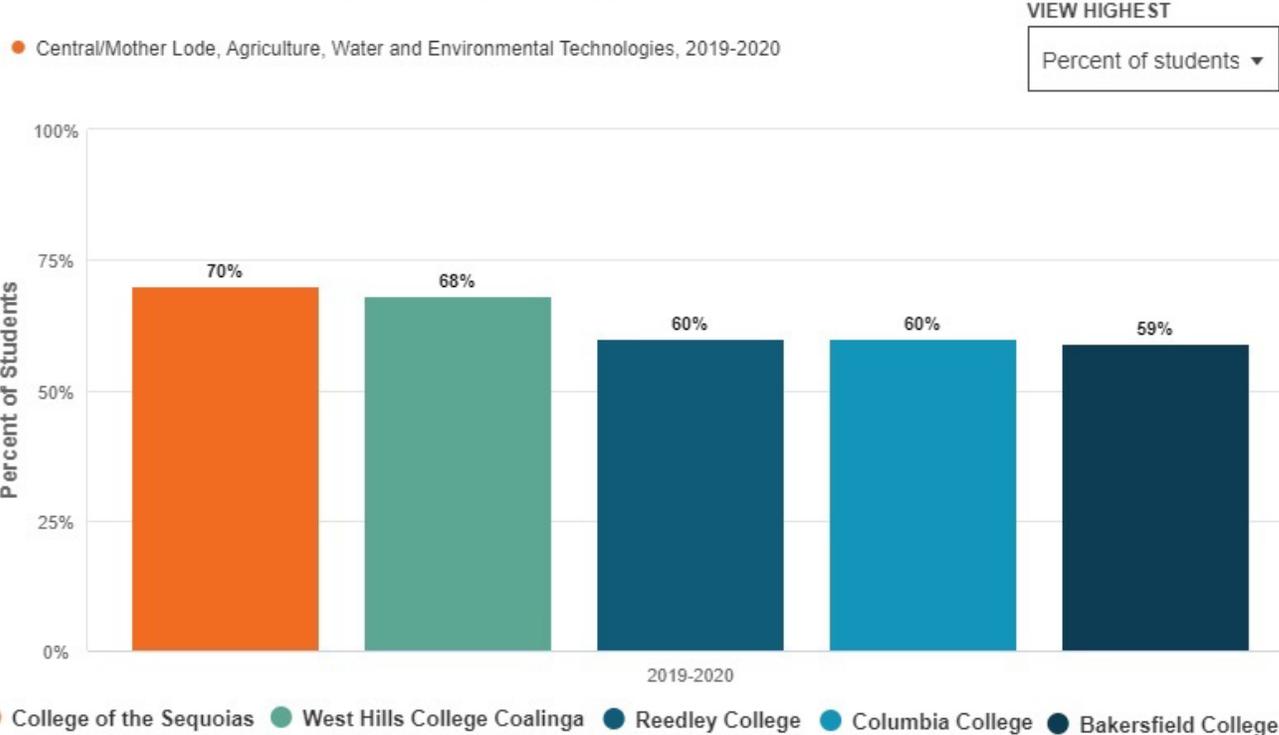

Identify Areas to Focus on for Improvement with Comparisons

Top Five Colleges, Districts, or Regions (depending on selections made) available for Completion, Transfer, Employment Rates, Attained the Living Wage, and Median Change in Earnings

Top Five Colleges for Living Wages

Among exiting CCP students who last took a course or earned an award in the selected TOP code in the selected year and who did not transfer, top five colleges with the highest proportion of CCP students who attained the district county living wage for a single adult

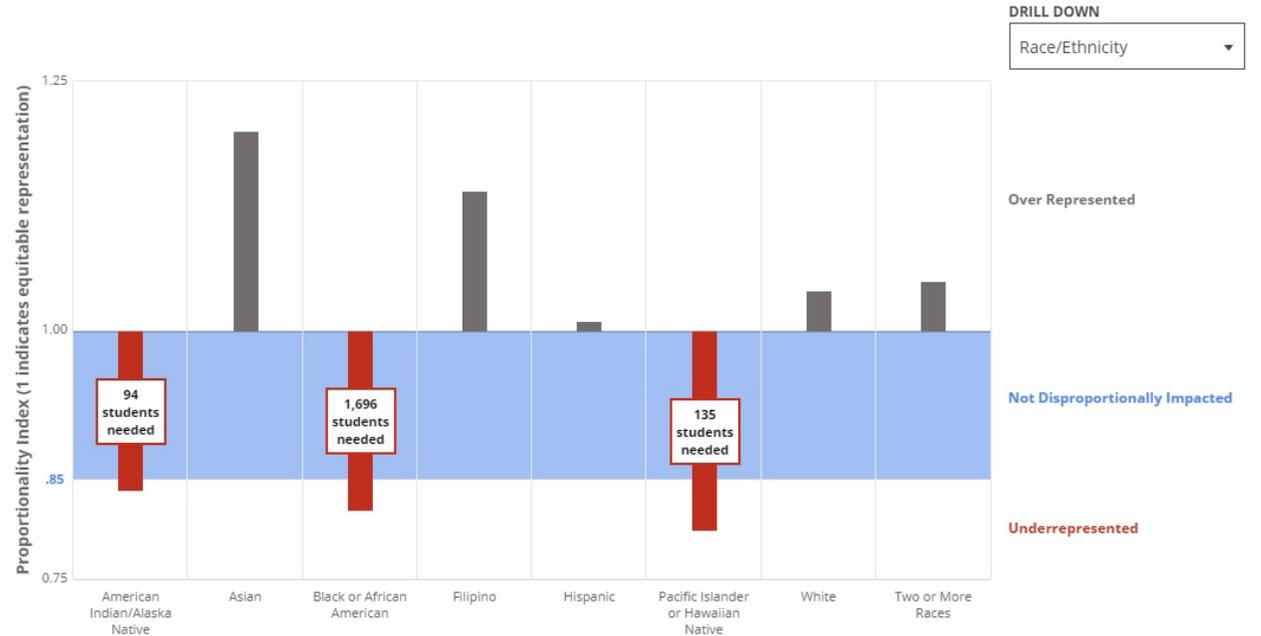

Understand equity gaps

Equity gap chart for completion

Are there Equity Gaps in Completion using a Proportionality Index?

For more detailed information, go to the Detailed Data view under the Equity Gap section.

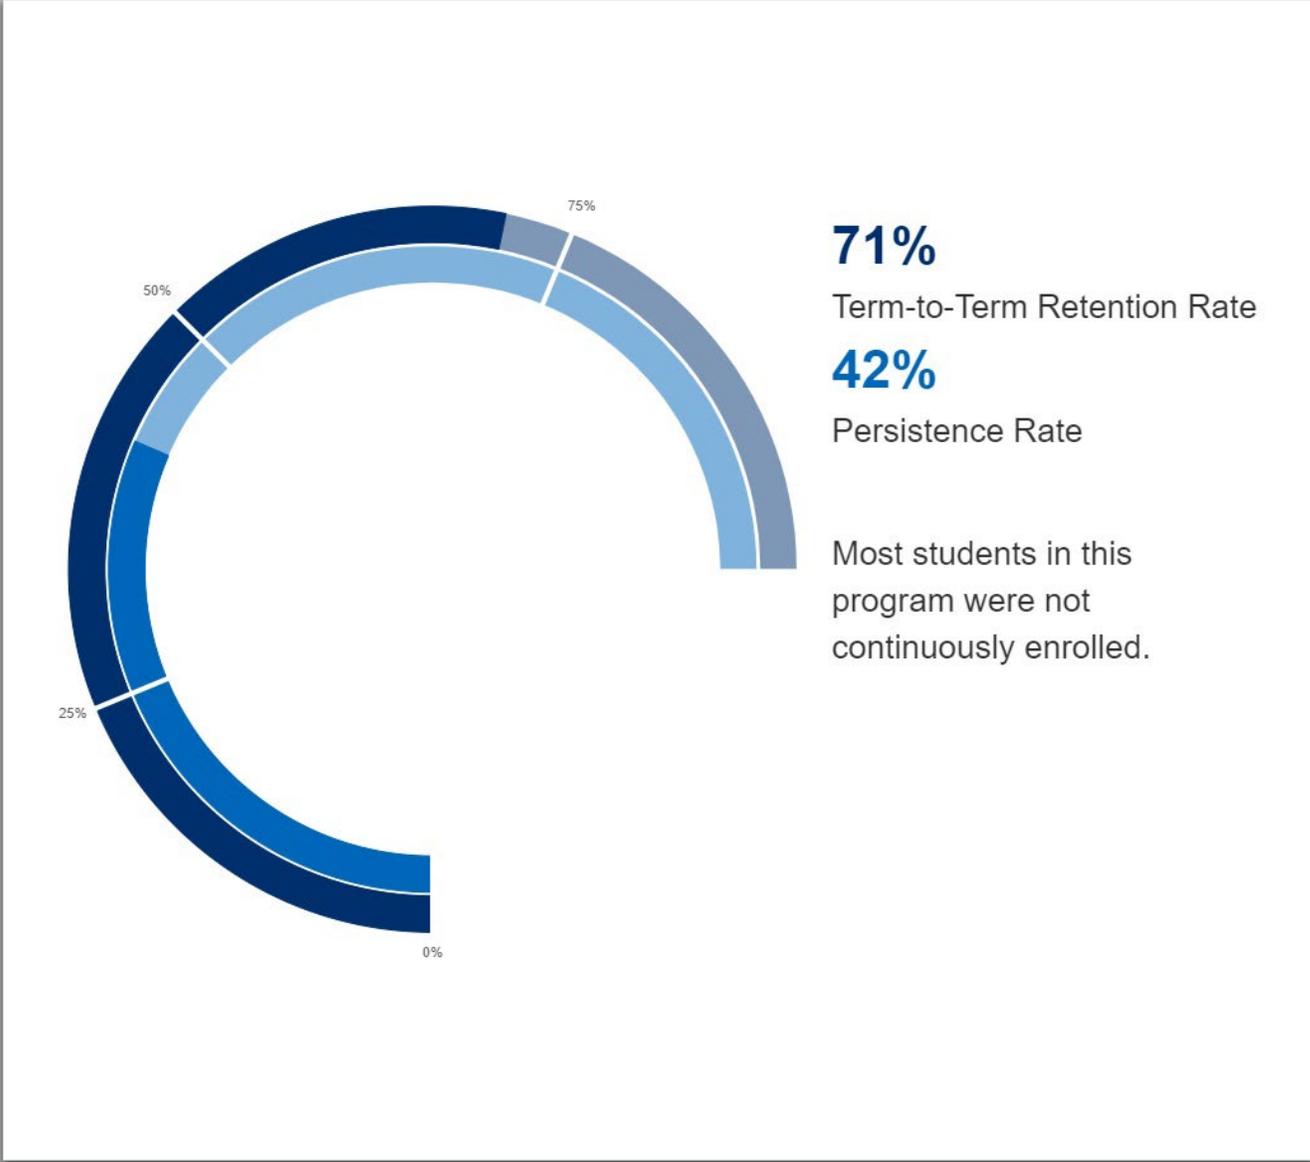

For the locale, program/sector and year selection made above, the Equity Gap charts shows how many students need to complete in order to Close the Equity Gap for underrepresented populations disproportionately impacted either by gender, race/ethnicity or age. The number of students needed to Close the Equity Gap refers to the number of students who need to complete (by gender, by race/ethnicity or by age) to achieve a one-to-one ratio. Example of a one-one-ratio: % of Hispanic students in the Health Sector in 2018-19 who completed = % of Hispanic students who enrolled in the Health Sector in 2018-19 at the college, district, microregion, macroregion, or statewide selected.

Ratio: percentage of the subgroup who completed compared to the percentage of the subgroup at the locale selected (college, district, microregion, macroregion, statewide)

Identify Barriers and Opportunities

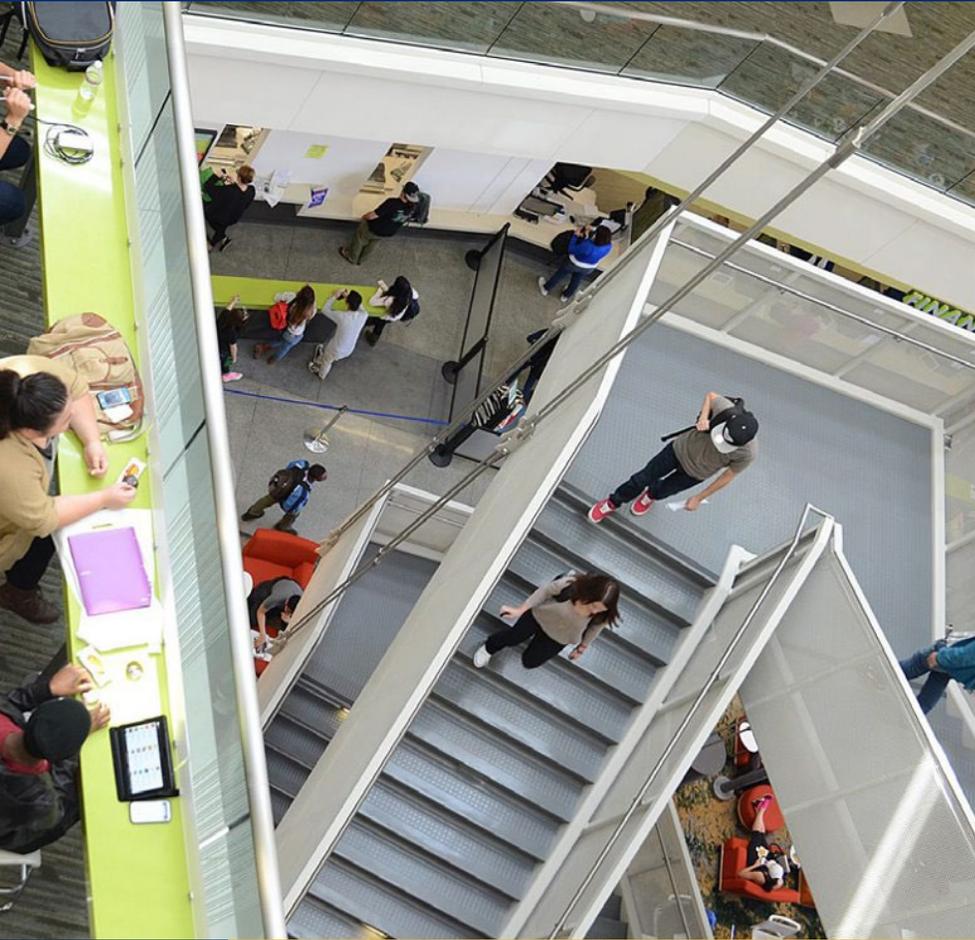

Retention and Persistence

Use Community College Pipeline data to select a path for improvement efforts

- Identify what has worked
- Gather more information to understand why the barriers exist
- Brainstorm and try solutions to address gaps
- Measure results and improve efforts

The Hard Truth

Dashboards cannot answer all your questions or the why, BUT the data can be useful

Types of Information: Interesting

Types of Information: Useful

Types of Information: Useful and Actionable

**Very
Actionable:
Eyewitness**

All Types of Information: Eyewitness

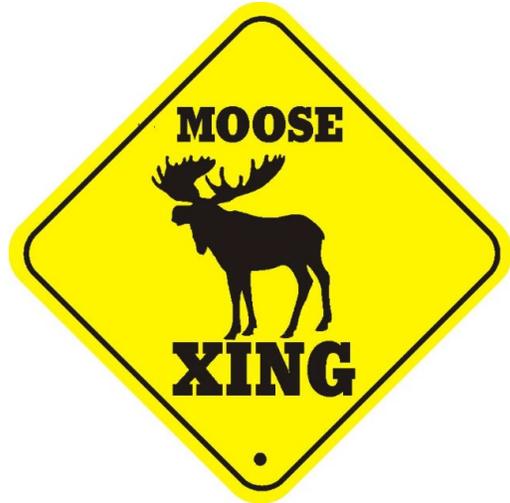

Joel, do you know what you are going to do after graduation with an AS in Accounting?

I've got a full-time job making \$85K/year as an Accounting Analyst for Disney. It took me 3.2 months to find it through Indeed. I got the job because you taught me how to prepare contribution-margin income statements in ACCT 031 in Spring 2021. Let me show you my pay stub.

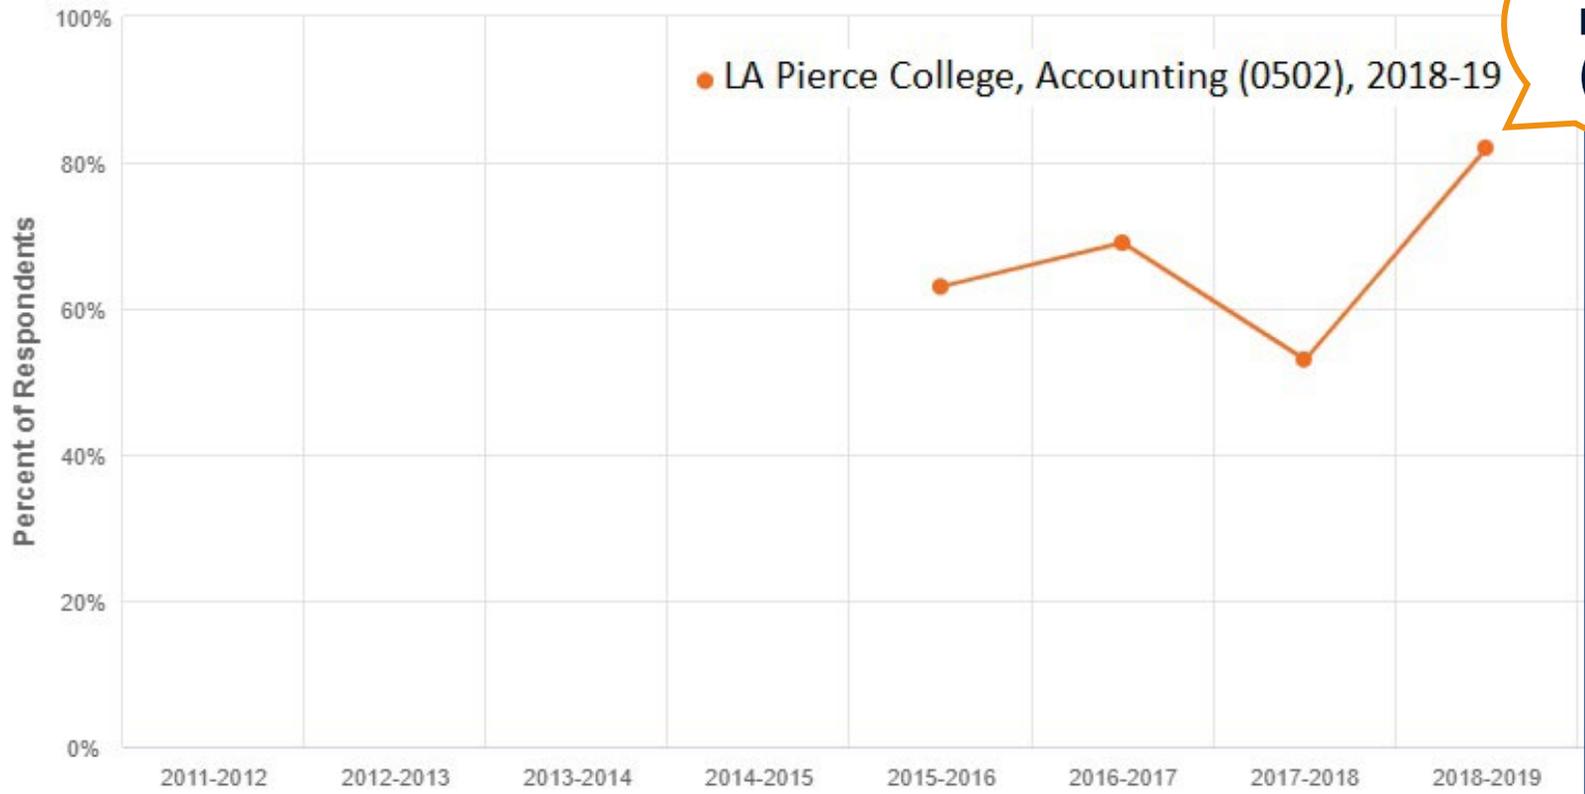

Dashboard data is more like this level of useful information

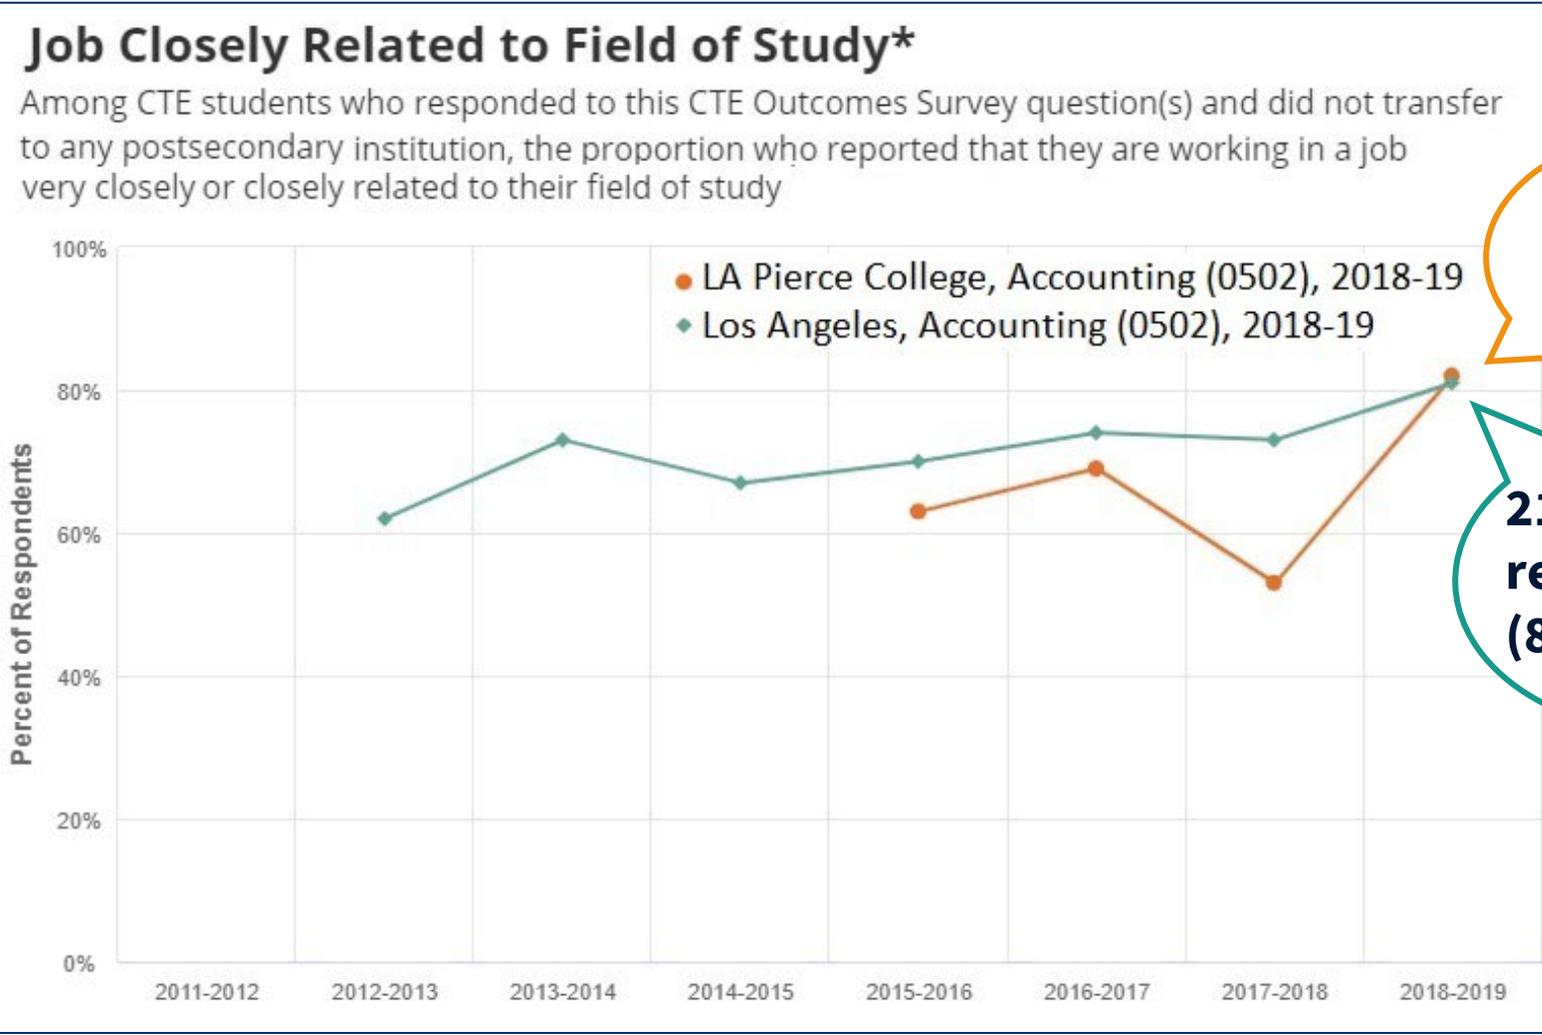

Job Closely Related to Field of Study*

Among CTE students who responded to this CTE Outcomes Survey question(s) and did not transfer to any postsecondary institution, the proportion who reported that they are working in a job very closely or closely related to their field of study

Dashboard data is more like this level of useful information

9 out of 11 respondents (82%)

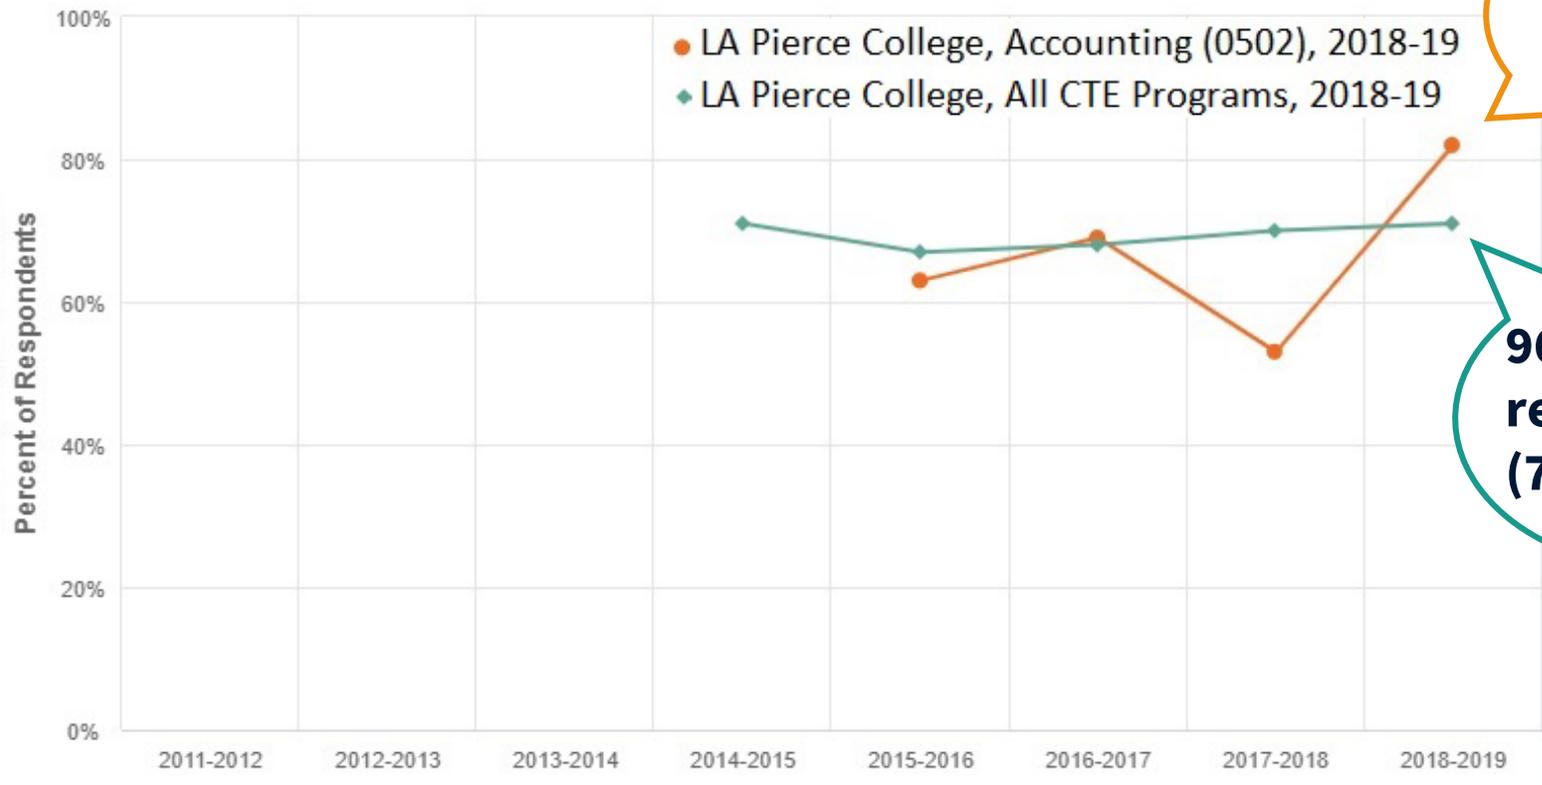

217 out of 267 respondents (81%)

Dashboard data is more like this level of useful information

Job Closely Related to Field of Study*

Among CTE students who responded to this CTE Outcomes Survey question(s) and did not transfer to any postsecondary institution, the proportion who reported that they are working in a job very closely or closely related to their field of study

9 out of 11 respondents (82%)

96 out of 135 respondents (71%)

Updates to CCP

New features and other changes in the most recent release

New Features in CCP

New Metric for Success: Attained the Vision Goal Definition of Completion or Transferred to a Four-Year Institution

New Drilldown: Perkins Economically Disadvantaged

New Locales: CalBright College and Madera College

New UI Features:

- Incomplete years of data display and notes from Student Success Metrics
- Toggle to display number or percentage of students for top five metrics
- Disaggregations added to Successfully Completed Unit Thresholds in the Fall Term and in the Selected Year

What to Understand about Display of Incomplete Years of Data in the CCP Snapshot View

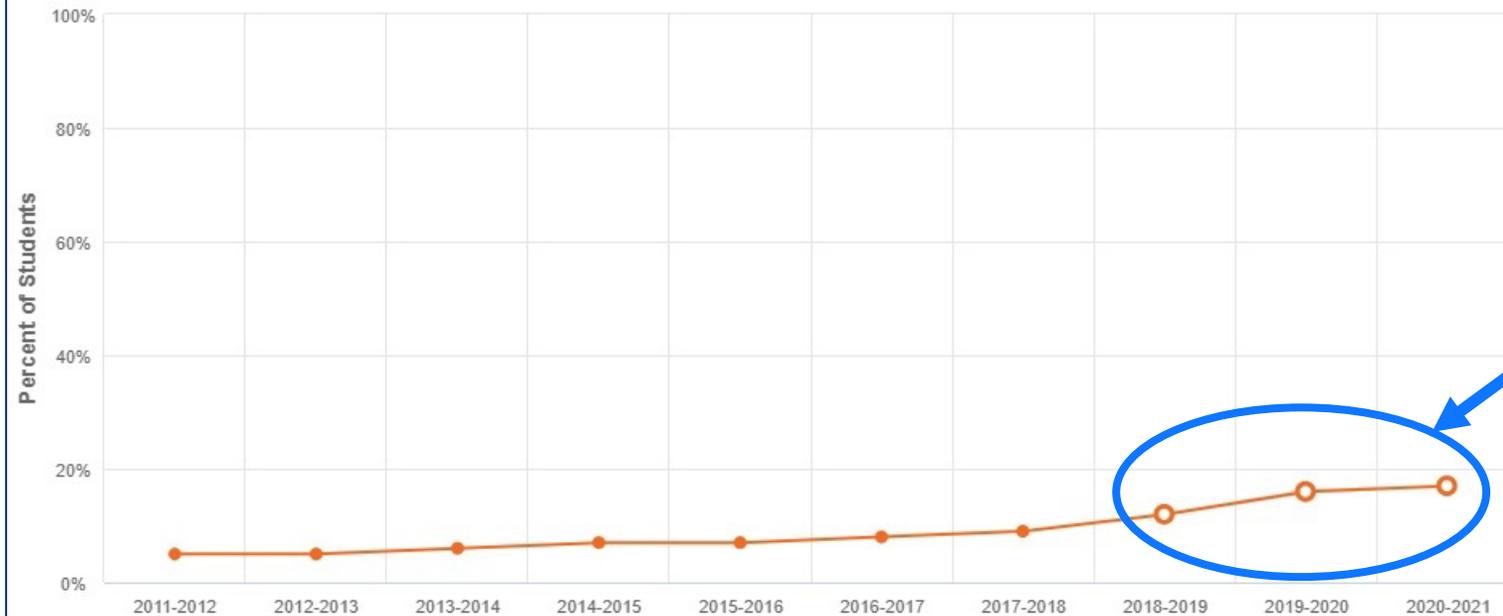

- Incomplete years of data will **update** over time
- Lighter, transparent bars or outlined markers signify that **incomplete years** of data are displayed
- In CCP the metrics with incomplete years of data include:
 - **3 Metrics in the Milestones View:** Completed Transfer Level Math and English, Math Only and English Only (Expanded View)
 - **1 Metric in the Employment View:** Employed in the Fourth Fiscal Quarter After Exit

Completion of TL Math & English (Expanded View)

**Time Trend
Display of
Incomplete
Years of Data**

Completion of Transfer-Level Math and English (Expanded)*

Among CCP students first-time NSA credit students, the proportion who completed both transfer-level math and English in their first academic year of credit enrollment from their first term within the district allowing for students who enrolled in credit ESL to complete transfer-level math and English within three complete years from first term

**Outlined
markers for
incomplete
years of data**

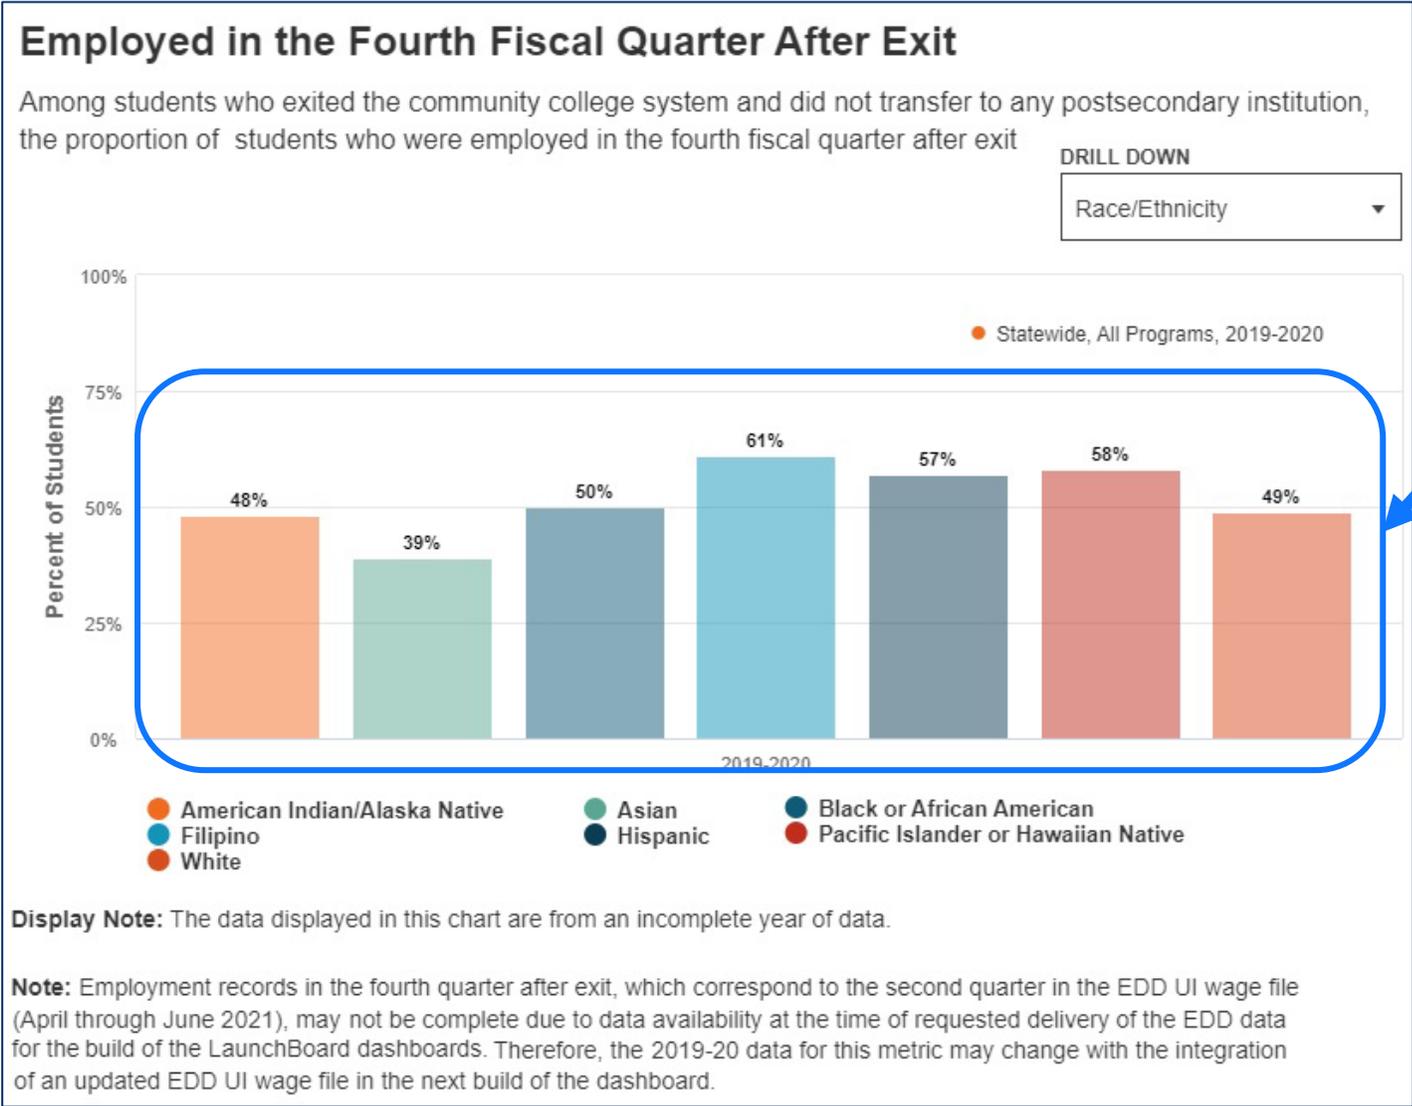

**Notes to remind
why incomplete
data is displayed
for this metric**

Display Note: Information is displayed for students where the timeframe allowed to meet the outcome of the metric is complete as noted by solid data point markers and incomplete as noted by outlined markers.

Note: The Completed Transfer-Level Math and English (expanded view) counts students who complete within one year from their first term of enrollment while Credit ESL students can complete within three years from their first term of enrollment. Therefore, depending on the academic year as data becomes available, values and percentages for these metrics will update over time for incomplete years as more students complete within the applicable timeframes from their first enrollment.

Employed in 4th Fiscal Quarter After Exit

Single Year Display of Incomplete Year of Data for Drill Down Selection

Lighter transparent bars are displayed for incomplete year of data

Notes to remind why incomplete data is displayed for this metric

Updates to Metrics

- Summary slides in Appendix for updates to metrics in Community College Pipeline including impact
- For a more thorough review of changes in definitions:

For thorough high-level explanations of significant changes, see the [Changes in Definition on CCP November 22](#) resource provided in the resource section

Live Demo

How to navigate the
Community College
Pipeline to find useful
information

The Use

How to understand equity gap charts and find labor market information in CCP

The importance of disproportionate impact calculations

- Consistency and intentionality
- A gap needs a reference point
- Use statistical methods to help be confident that a gap exists (that it's not random chance)
- Help inform prioritization based on the size the gap or number of students impacted

What equity gaps exist in transfer rates for students of different races/ethnicities?

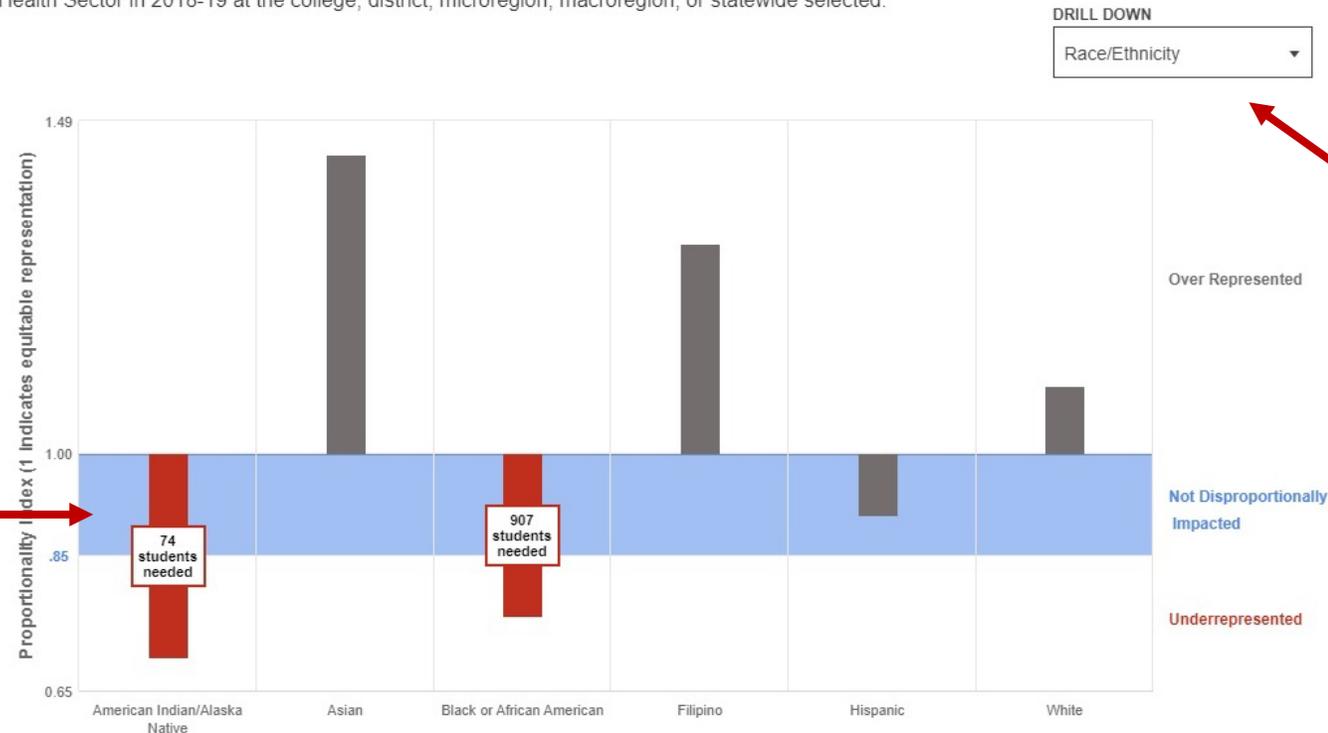

The number of students needed to transfer to eliminate the equity gaps is displayed for Underrepresented student populations with substantive DI.

For example, if 907 more Black and 74 more American Indian/Alaska Native CTE students transferred to a four-year, the equity gap would be eliminated.

Are there Equity Gaps in Transfer using a Proportionality Index? ⓘ

For more detailed information, go to the Detailed Data view under the Equity Gap section.

For the locale, program/sector and year selection made above, the Equity Gap charts shows how many students need to transfer in order to Close the Equity Gap for underrepresented populations disproportionately impacted either by gender, race/ethnicity or age. The number of students needed to Close the Equity Gap refers to the number of students who need to transfer (by gender, by race/ethnicity or by age) to achieve a one-to-one ratio. Example of a one-one-ratio: % of Hispanic students in the Health Sector in 2018-19 who transferred = % of Hispanic students who enrolled in the Health Sector in 2018-19 at the college, district, microregion, macroregion, or statewide selected.

Pop-up text to describe Proportionality Index

View gaps by gender, race/ethnicity or age group

5 Things to Know About Labor Market Information (LMI)

1. The coding system for LMI or Labor Market Demand and Supply is based on **national data** by US Bureau of Labor Statistics and the Department of Education:
 - SOC Codes (Standard Occupational Codes)
 - CIP Codes (Classification of Instructional Programs)
 - Typical Entry-Level of Education for a SOC code
2. Since TOP codes are unique to CA Community Colleges, a **TOP-SOC crosswalk** is needed to map SOC codes to TOP codes which is based on the national CIP-SOC crosswalk.
3. **One SOC code nearly always represents many different jobs** and job titles and can map to more than one program or CIP code (See [o*net](#) for more information on SOC codes)

5 Things to Know About LMI (Continued)

4. Labor Market Data is very **different** from Online Job Postings

- Labor Market Data is useful for getting an understanding of trends in employment and earnings over time
- Information from online job postings helps to augment the traditional labor market data

5. Since **Typical Entry-Level Education** is based on national data, **alternative paths to employment may vary at the regional level**

- Because of this, a SOC code's 'Typical Entry-Level Education' might not align to local or regional skills requirements for a given job or industry

[Technical Definition](#)

What skills are needed for those jobs?

Hard Skills Requested in Online Job Postings (90 days)

The number of unduplicated online job postings for top five hard skills in top 10 occupations in the region associated with the selected industry sector or TOP code in the locale selected over a 90-day period (July -Sept 2021). Hard skills are specific, learnable, measurable, often industry- or occupation-specific abilities related to a position. Example: JavaScript might be a hard skill for a data analyst or CPR for a nurse.

• Los Rios District, Business and Entrepreneurship, 2019-2020

| | Skill |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|
| Bachelor's Degree Or Higher | |
| | Software Engineering |
| <ul style="list-style-type: none"> Accountants and Auditors (13-2011) Loan Officers (13-2072) Sales Managers (11-2022) Software Developers and Software Quality Assurance Analysts and Testers (15-1256) | Accounting |
| | Java (Programming Language) |
| | Python (Programming Language) |
| | SQL (Programming Language) |

Acting on the data

Work with colleagues to answer the following questions:

- What other information do you need?
- Which partners need to be involved?
- What are all the possible ideas for addressing the gaps and acting on the opportunities you identified?
- Which of these ideas are likely to benefit students?
- Which of these ideas are within your current capacity to implement?
- How can you measure what's working and make improvements as you go?

Q&A

Give us your feedback!

Feedback survey link:
<https://www.surveymonkey.com/r/2022CCPDASH>

California Community Colleges

Thank you!

www.cccco.edu

Appendix

Review of Updates

Offerings View: Enrollment

- Updated to count the total no. of enrollments on the selected TOP code instead of counting all enrollments on all TOP codes for students enrolled on the selected TOP code

Students:

- **Age Groups:** students with birthdays after 10/15 of the selected year were incorrectly determined to be one year older potentially placing them in the incorrect age group
- **LGBT:** students matched now on derkey for CCCApply data
- **First-Time:** updated to align more closely with first-time cohort in SSM by removing students who received all MW or EW grades for SX04 Enrollment-Grade in all credit courses in their first term*
- **First-Time Credit:** see Age Groups above where students no longer excluded because now under 18 when found in the transfer bucket
- **Current Special Admit:** students who were only ever special admit and who never had a non-special admit enrollment at any CA community college are now included

IMPACTS

- ➔ Enrollments are lower
- ➔ 19 or less age group is higher and other age groups are lower
- ➔ More students are flagged as LGBT
- ➔ Less students are considered first-time
- ➔ More students are considered first-time credit
- ➔ Many more students are considered current special admit

Review of Updates

Student and Milestones: Goals and Noncredit Metrics

- Carry forward COVID logic for Spring 2020 to all terms in 2020-21 to include students with any noncredit enrollment because of inconsistent reporting for SX05 Positive Attendance Hours
- Remove hours reported and students enrolled on 493009 Supervised Tutoring and 493014 Study Skills as valid noncredit enrollments

Milestones:

- **Completed Unit Thresholds:** 0-unit buckets have been added
- **Transition from Noncredit to Credit:** two of the three metrics displayed are now more closely to their definitions

Success:

- **Students Who Attained Apprenticeship:** Derkey now used to identify students prior to 2011-12
- **Average Time to Degree:** students who earned multiple degrees in a year are deduplicated

IMPACTS

- ➔ The number of students included in the Short-Term Career Ed. Journey is lower, and other noncredit outcomes are slightly lower
- ➔ 0 units as a threshold is now included
- ➔ Impact depends on TOP code selected but overall higher counts and percentages
- ➔ Values are much higher in earlier years and slightly higher in later
- ➔ Denominators are lower and average time to attainment very slightly impacted

Review of Updates

Earnings: Median Annual Earnings, Median Change in Earnings, Attained the Living Wage, Longer-Term Earnings

- All wages equated to 2021 wages instead of 2020 wages; so, wage higher by 1% to 2% expect for colleges in LA county where there was a change to the underlying data provided by EDD for 2012 through 2018 and wages are lower by just over 0% to 5% for some colleges in that county

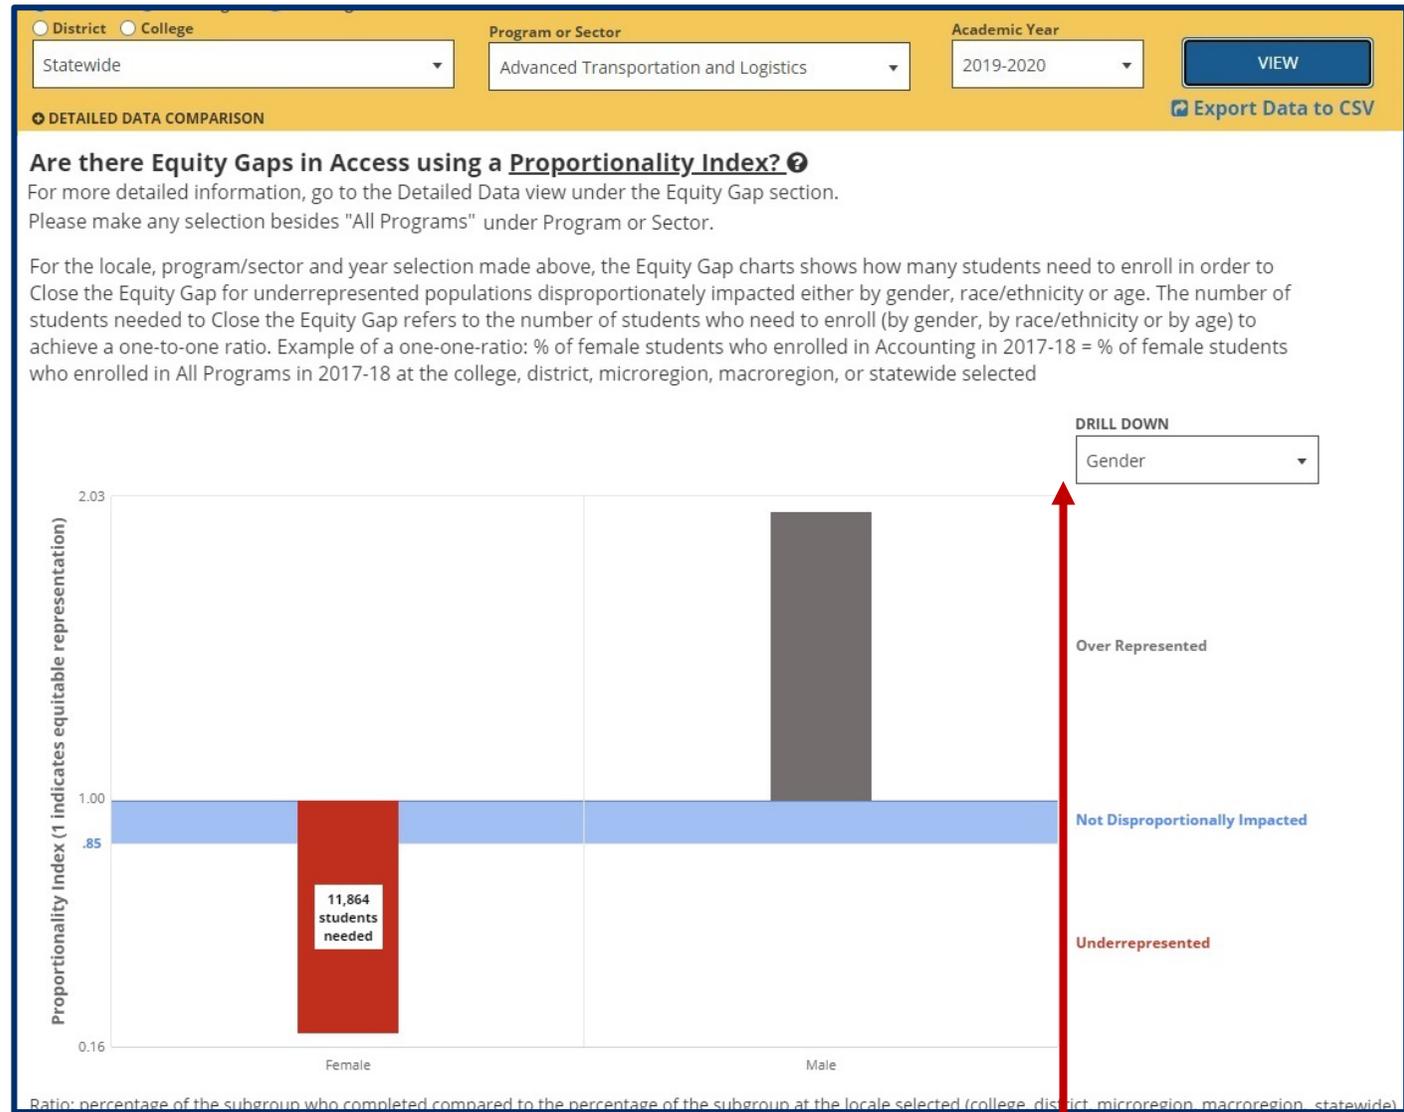

For thorough high-level explanations of significant changes, see the [Changes in Definition on CCP November 22](#) resource provided in the resource section

Equity Gap Charts

Available in summary and detailed data views for the following metrics:

- Access (Enrollment)
- Completion
- Transfer

Different than just using the drilldown to compare %s

View gaps by gender, race/ethnicity or age group

Equity Gap Charts

What is a proportionality index?

A methodology to identify where there are equity gaps between different student population groups, beyond direct comparisons

It provides a consistent measurement to identify:

For whom?

Which student groups are experiencing disproportionate impact and are underrepresented?

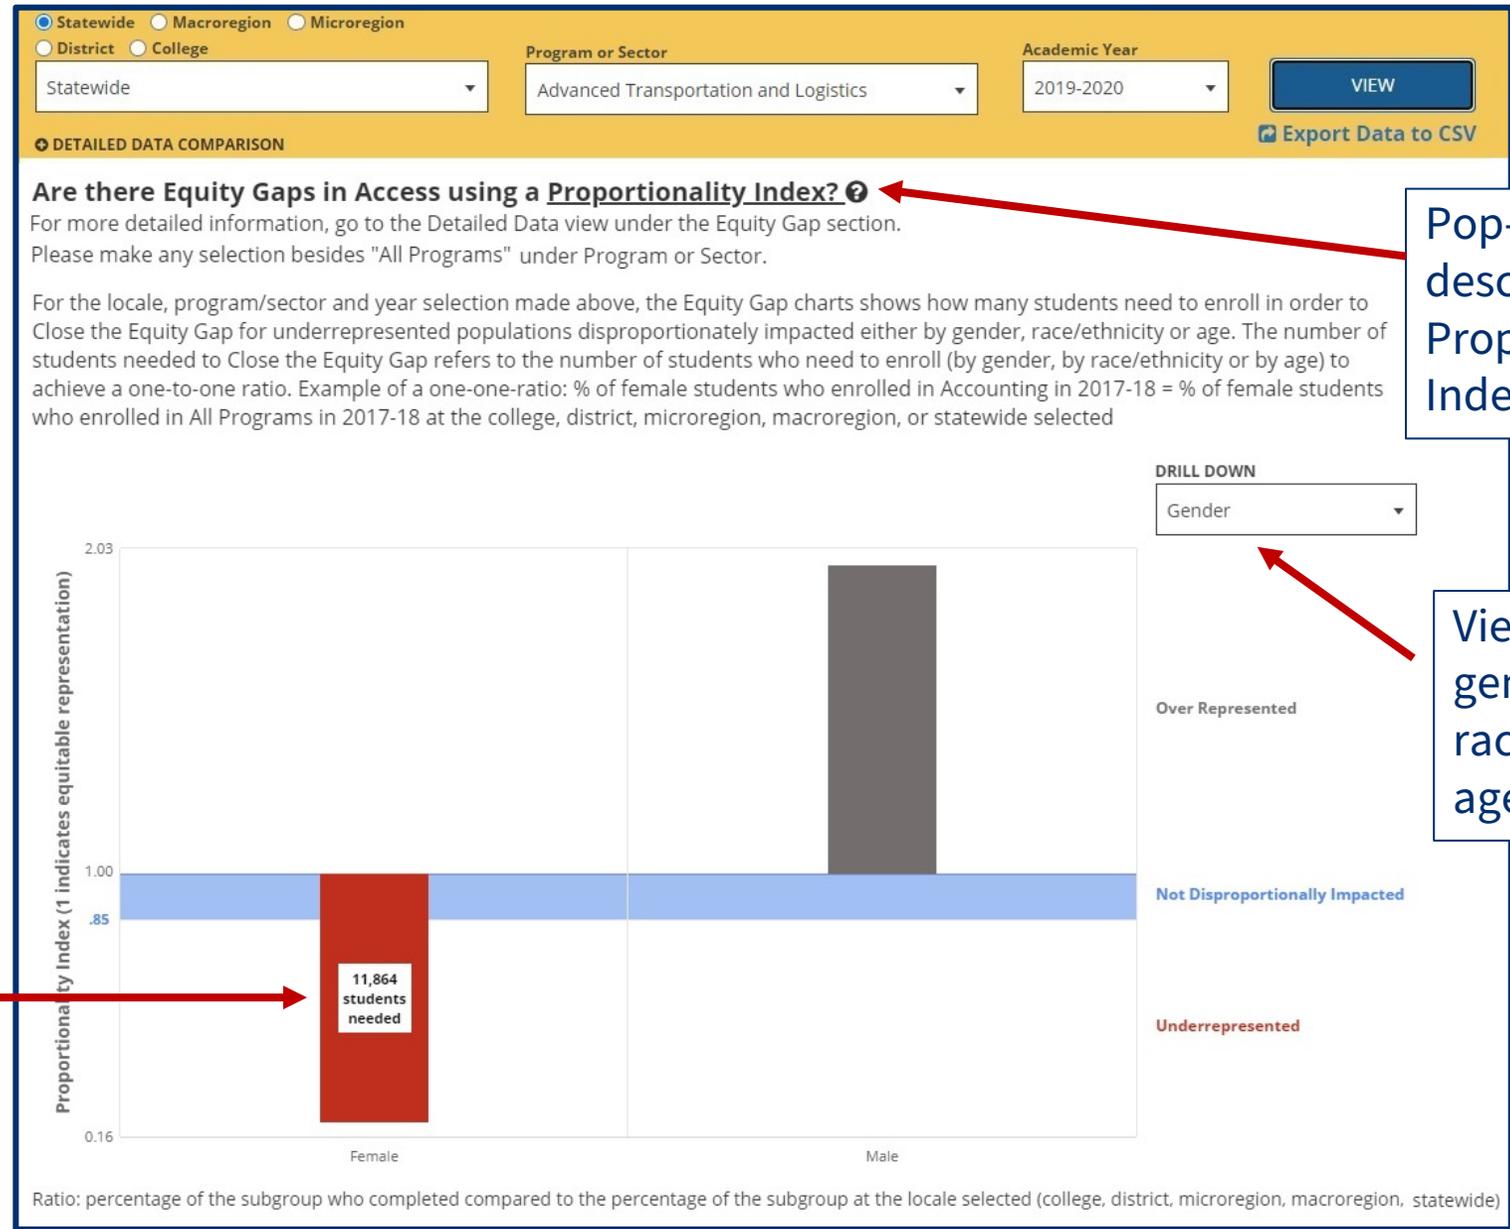

How big?

How many students' outcomes need to change to close the equity gap?

Summary View of Equity Gap Chart for Access

The number of students needed to enroll to eliminate the equity gaps is displayed for Underrepresented student populations with substantive DI.

For example, 11,864 more female students need to enroll in the Advanced Transportation and Logistics sector to eliminate the equity gap.

Pop-up text to describe Proportionality Index

View gaps by gender, race/ethnicity or age group

Feedback and questions are encouraged to improve display. Please email launchboard@cccco.edu

Proportionality Index for Calculating Equity Gaps

Proportionality Index

A proportionality index of 1.00 indicates that a subgroup's representation among those achieving an educational outcome is identical to that subgroup's representation in the student population. If the ratio or index for a subgroup is less than 0.85 in terms of attainment of a metric outcome, then the Chancellor's Office considers that subgroup to be disproportionately impacted or underrepresented for that metric outcome.

Example Calculation:

- Group A accounts for 30% of the college population and 20% of the completions
 - $20\% / 30\% = .67$ therefore underrepresented in completions and disproportionately impacted
- Group B accounts for 30% of the college population and 30% of the completions
 - $30\% / 30\% = 1$ therefore equally represented in completions and not disproportionately impacted
- Group C accounts for 40% of the college population and 50% of the completions
 - $50\% / 40\% = 1.2$ therefore overrepresented in completions and not disproportionately impacted

Group A: Underrepresented with
Disproportionate Impact

Group B: Underrepresented
without Disproportionate Impact

Group C: Overrepresented

Equity Gap Charts

How is a proportionality index calculated?

A ratio comparing the percentage of students in a specific population who enrolled, completed, or transferred to the percentage of those students in the overall population

For example, in the Energy, Construction, Utilities **sector** in the Bay Area **region**:

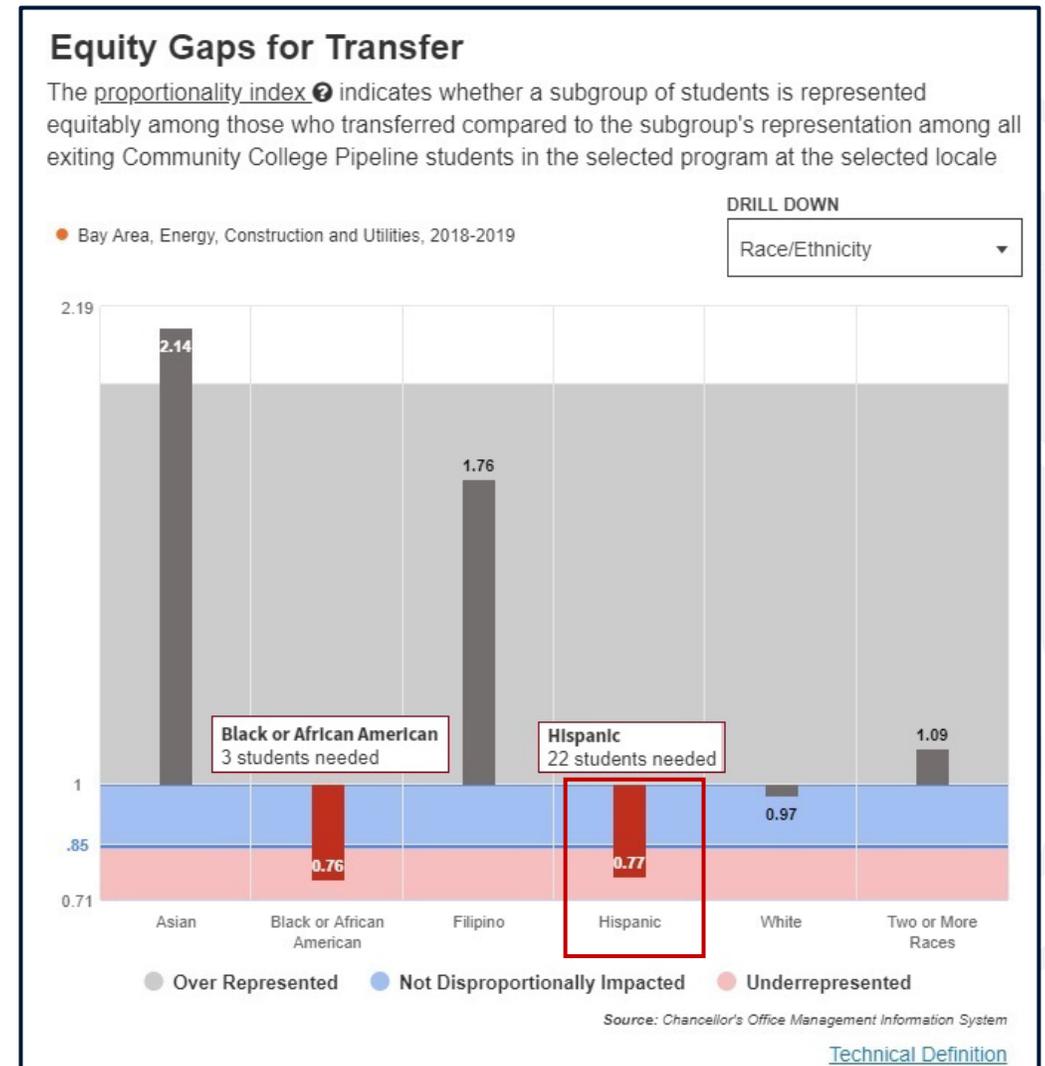

- **27% of the students who transferred** to a four-year institution in 18-19 identify as Hispanic
- **35% of enrolled students** identify as Hispanic

$$0.27/0.35 = 0.77$$

Underrepresented with Disproportionate Impact

While PI ratios may be similar, the size of the problem may not be

Detailed Data View of Equity Gap Charts for Completion & Transfer

PI Ratios displayed for all student populations

The blue line visualizes when an equity gap exceeds a ratio of .85, indicating that a subgroup is considered underrepresented

Hover over the bar to see a pop-up that provides the number of students who needs to complete in order to eliminate the equity gap

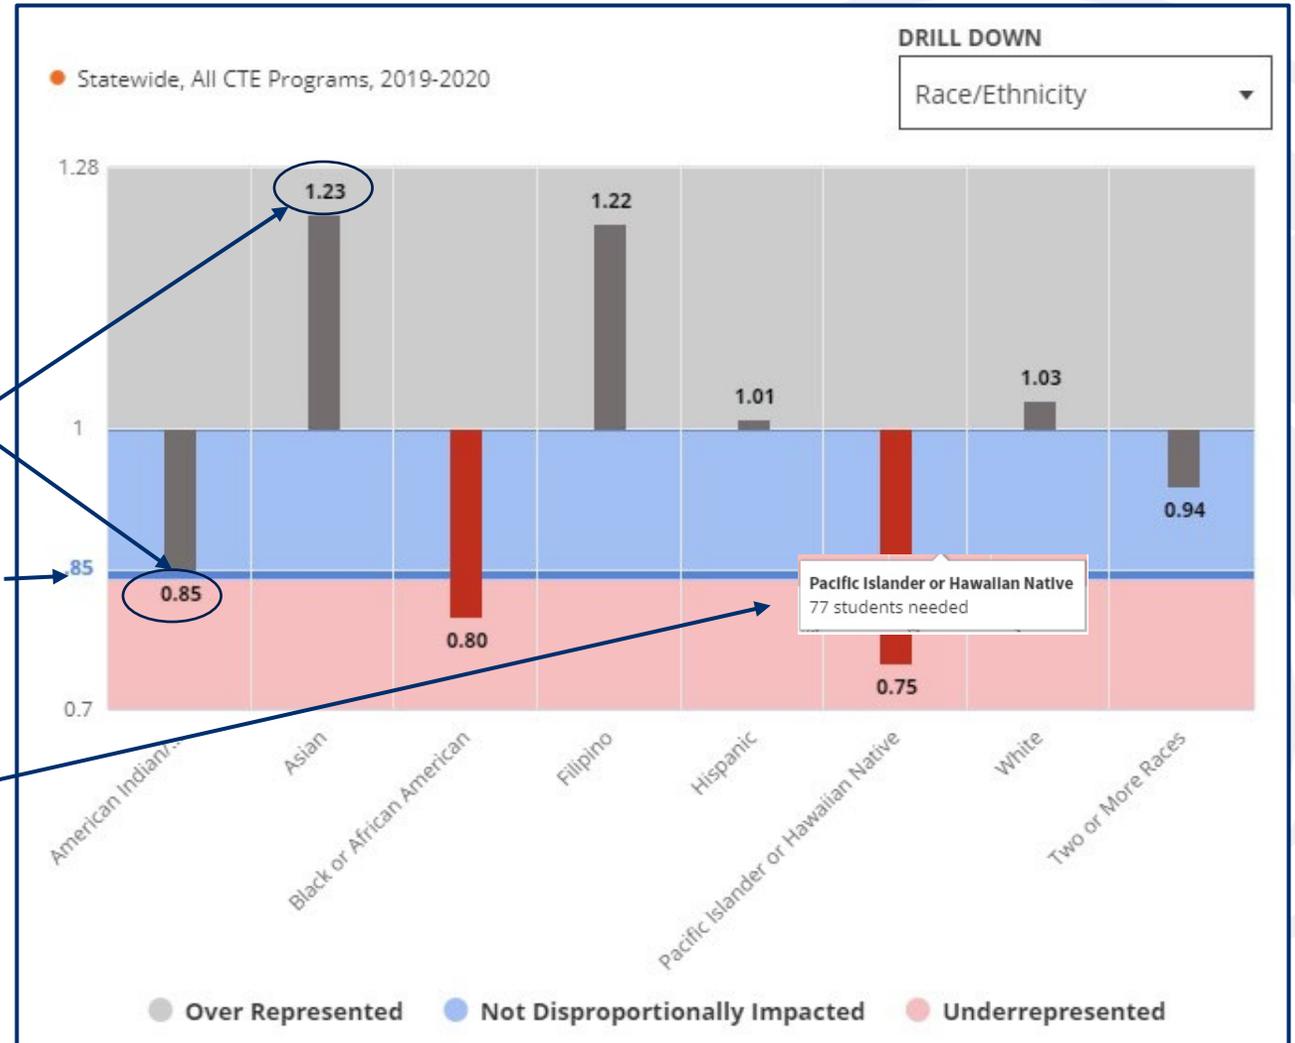

Table on the Detailed Data View of Equity Gap Chart for Completion & Transfer

Example: Completion | All CTE Programs | Race/Ethnicity

1. % of Pacific Islander students who completed in all CTE programs
2. % of Pacific Islander students in all CTE programs
3. % Pacific Islander students who completed in all CTE / % of Pacific Islander students in all CTE = PI Ratio
4. # of Pacific Islander completers in all CTE programs
5. Total # of Pacific Islander students who need to complete in all CTE for a 1:1 ratio
6. (Total # of Pacific Islander students who need to complete in all CTE for a 1:1 ratio) – (# of Pacific Islander students who completed in all CTE) = **# of Pacific Islander students who need to complete in all CTE for a 1:1 ratio**
7. Over (PI ratio > 1), Under without DI Impact (PI ratio 0.85 < 1), Under with DI impact (PI ratio < 0.85)

| Ethnicity | % Completed | % of Total | % Completed / % of Total | PI Ratio | Students | | | Under with Disproportionate Impact (0.85 or less), Under without Disproportionate Impact, Over Represented |
|-------------------------------------|-------------|------------|--------------------------|----------|-----------------|------------------------------|------------------------------------|------------------------------------------------------------------------------------------------------------|

5 Things to Know About Labor Market Information (LMI)

1. The coding system for LMI or Labor Market Demand and Supply is based on **national data** by US Bureau of Labor Statistics and the Department of Education:
 - SOC Codes (Standard Occupational Codes)
 - CIP Codes (Classification of Instructional Programs)
 - Typical Entry-Level of Education for a SOC code
2. Since TOP codes are unique to CA Community Colleges, a **TOP-SOC crosswalk** is needed to map SOC codes to TOP codes which is based on the national CIP-SOC crosswalk.
3. **One SOC code nearly always represents many different jobs** and job titles and can map to more than one program or CIP code (See [o*net](#) for more information on SOC codes)

5 Things to Know About LMI (Continued)

4. Labor Market Data is very **different** from Online Job Postings

- Labor Market Data is useful for getting an understanding of trends in employment and earnings over time
- Information from online job postings helps to augment the traditional labor market data

5. Since **Typical Entry-Level Education** is based on national data, **alternative paths to employment may vary at the regional level**

- Because of this, a SOC code's 'Typical Entry-Level Education' might not align to local or regional skills requirements for a given job or industry

Labor Market Data

[Technical Definition](#)

Note: Microregion data will be displayed when college, district or microregion is selected; macroregion data will be displayed when macroregion is selected; statewide data will be displayed when statewide is selected.

Total 2020 and 2025 Jobs in Microregion where college is located displayed along with **top 5 SOC codes** (in term of 2020 Jobs) mapped to program or sector selection grouped by Skill Level: Typical Entry-Level Education

Labor Market Data

Available in the detailed data view under Labor Market Data under Earnings:

- Regional Entry-Level and Median Annual Salaries

Compares the Regional Average Annual Entry-Level and Median Salaries in the Micro or Macro Region or Statewide to the top 5 occupations (in terms of Annual Openings 2020-25) mapped to the program or sector selected

Regional Entry-Level and Median Annual Salaries

The regional average entry-level (10th percentile) and median annual salaries of people employed in occupations associated with the selected TOP code in the microregion where the college is located

● Bay Area, Energy, Construction and Utilities, 2019-2020

Online Job Postings

Available the detailed data view under Online Job Postings:

- Hard Skills (90- and 365-day periods)
- Common Skills (90- and 365-day periods)
- Qualifications (90- and 365-day periods)
- Employers (90- and 365-day periods)
- Expand to see table with No. of postings for prior 90- or 365-day period compared to latest 90-day or 365-day period

Hard Skills Requested in Online Job Postings (365 days)

The number of unduplicated online job postings for top five hard skills in top 10 occupations in the region associated with the selected industry sector or TOP code in the locale selected over a 365-day period (Oct 2020 -Sept 2021). Hard skills are specific, learnable, measurable, often industry- or occupation-specific abilities related to a position. Example: JavaScript might be a hard skill for a data analyst or CPR for a nurse.
